

Cabarrus Rowan Urban Area
Metropolitan Planning Organization
Transportation Advisory Committee

Wednesday August 23, 2023

5:30 pm

Dinner provided by
Town of Harrisburg

NC Research Campus
Kannapolis City Hall
401 Laureate Way
Kannapolis, NC 28081

Agenda

1) Call to Order TAC Chairman Dayvault

- Pledge of Allegiance
- Roll Call of Members for Quorum & Introduction of Guests
- List of Eligible TAC Voting Members
- Ethics Reminder
- Chamber of Commerce Update
- Speakers from the Floor (3 minutes per speaker)
- Adjustments/Approval to the Agenda including Consent

CONSENT AGENDA

All items on the consent agenda are considered to be routine and may be enacted by one motion. If a TAC member requests discussion on an item, the item will be removed from the consent agenda and considered separately. The following items are presented for TAC consideration on the Consent Agenda:

NO ITEMS FOR CONSIDERATION

THIS CONCLUDES THE CONSENT AGENDA

2) Approval of May 24, 2023 minutes TAC Chairman Dayvault

3) FY 2020-2029 MTIP Modification #19 Phil Conrad

INFORMATION: MPO staff typically brings amendments or modifications from recent NCDOT Board of Transportation agendas to the TCC/TAC for consideration. The first project modification is the addition of preliminary

engineering for the Clarke Creek Greenway in FY 23 (BL-0060). The second project modification is the addition of the Concord Signal System project in FY 2024 (HE-0123). The third project modification is to add a project break for the Vulnerable Road User Pedestrian Bicycle Improvement Program in FY 23 for (HS-2024DIV) and (HS-2024REG) and (HS-2024SW) and (HS-2025DIV) and (HS-2025REG) and (HS-2025SW). The final project is to delay professional engineering to FY 23 for the Brenner Avenue Safety Improvements (HL-0049). Attachment 3 is a resolution modifying the MTIP for these projects. The new STIP is schedule to be adopted in June and will be effective October 1, 2023.

ACTION/RECOMMENDATION: 1) Receive a report on modification #19 to the FY 2020-2029 MTIP; 2) Discuss; and 3) Consider endorsing modification #19 to the FY 2020-2029 MTIP.

4) FY 2024-2027 TIP Conformity Phil Conrad

INFORMATION: The Cabarrus-Rowan MPO and the Metrolina Regional Partners have been working on an Air Quality Conformity Analysis and Determination Report for the 2024-2027 TIP. A copy of the report is on the MPO website. The TIP Conformity Report demonstrates that the financially constrained MTP's in the Metrolina Region meet national ambient air quality standards. An explanation of the fiscal constraint prologue is included as attachment 4A. The report also certifies that the Transportation Improvement Program is a subset of the 2050 MTP and the Conformity Report is consistent with the State Implementation Plan (SIP). An excerpt from the TIP Conformity Report is provided as attachment 4B.

ACTION / RECOMMENDATION: 1) Receive a report on the Air Quality Conformity Analysis and Determination Report; 2) Discuss; and 3) Consider adopting the Air Quality Conformity Analysis and Determination for the 2024-2027 TIP and financial prologue for the STIP.

5) FY 2023-24 UPWP Amendment #1 Phil Conrad

INFORMATION: The MPO currently has some special study funds that have not been assigned. The Town of China Grove is requesting \$48,000 in special study funds for a corridor study of NC 152 east. The Town would be responsible for the remaining 20 percent local match (\$12,000) for their proposed project. The resolution to amend the UPWP and increase the line item for "Special Studies" (II-B-3) by \$48,000 is included as attachment 5.

ACTION/RECOMMENDATION: 1) Receive a report on the Amendment #1 to the FY 2023-24 UPWP; 2) Discuss; and 3) Consider adopting amendment #1 to the 2023-24 UPWP.

6) Rider Public Transportation Agency Safety Plan Phil Conrad

INFORMATION: The Public Transportation Agency Safety Plan (PTASP) final rule (49 C.F.R. Part 673) requires certain operators of public transportation systems that are recipients or subrecipients of FTA grant funds to develop safety plans that include the processes and procedures necessary for implementing Safety Management Systems (SMS). On 12/16/2019, Concord Kannapolis Area Transit/City of Concord notified NCDOT that they would not be drafting and certifying it's own Public Transportation Agency Safety Plan, choosing to draft and certify their Public Transportation Agency Safety Plan under NCDOT's framework and requirements as they are allowed by FTA to do as a small (less than 100 bus) public transportation provider. The document was approved by the Concord Kannapolis Area Transit Commission on August 2, 2023 and will go to the Concord City Council for approval following action by the MPO. A request for approval by the NCDOT is the last step prior to final certification. The PTASP (309 pages) can be found at: www.ckrider.com/resources/documents/

ACTION/RECOMMENDATION: 1) Receive a report on the Rider Public Transportation Agency Safety Plan; 2) Discuss; and 3) Consider approving the Rider Public Transportation Agency Safety Plan.

7) DRAFT 2026-2035 TIP Project Call Addendum Phil Conrad

INFORMATION: With the anticipated adoption of the 2024-2033 TIP in June, MPO staff prepared a schedule for identifying and adopting the next STI list for the MPO area. The first step was to have a call for *new* projects (all modes) and the deadline for submitting *new* projects was May 5th. Over the summer, the MPO received 2 project additions to the list of new projects: Asheville to Salisbury Passenger Rail and the Mid-Carolina Parallel Taxiway. Attachment 7A includes the resolutions and supporting information for the 2 projects and attachment 7B is the amended list of the *new* projects (11). This list is not inclusive of any holding tank (select), P6.0 carryover, or previous carryover projects that will automatically be evaluated by NCDOT. A list will be provided by NCDOT at a later date.

ACTION/RECOMMENDATION: 1) Receive a report on the 2 NEW TIP Priority Projects; 2) Discuss; and 3) Consider endorsing the 2 NEW TIP Priority projects for submittal to NCDOT for quantitative review.

8) Reports / MPO Business Phil Conrad / TAC Members

- Local Reports – NCDOT Division 9 & 10
- Rowan Transit System Section 5310 Grant Application Letter of Support
- Federal Certification Review

- 2020 Census Planning Boundary Schedule of Activities
- Special Study Closeouts – Rowan County and Town of China Grove
- CMAQ Program Update

9) Information Items

Phil Conrad

- Rider and Salisbury Transit Ridership
- TPD Newsletter

Next meeting: September 27, 2023

- Agenda items for September TAC meeting

NORTH CAROLINA STATE ETHICS COMMISSION

SAMPLE¹

ETHICS AWARENESS & CONFLICT OF INTEREST REMINDER

(to be read by the Chair or his or her designee at the beginning of each meeting)

In accordance with the State Government Ethics Act, it is the duty of every [Board] member to avoid conflicts of interest.

Does any [Board] member have any known conflict of interest with respect to any matters coming before the [Board] today?

If so, please identify the conflict and refrain from any participation in the particular matter involved.

Rev 12-13-12

¹ N.C.G.S. §138A-15 (e): “At the beginning of any meeting of a board, the chair shall remind all members of their duty to avoid conflicts of interest under [Chapter 138A].” There is no set language required by the Act. Specific language can and should be tailored to fit the needs of each covered board as necessary.

Kannapolis, NC 28081

Members

JC McKenzie	City of Concord
Greg Edds	Rowan County
JC McKenzie	City of Concord
Lori Furr	Town of Mount Pleasant
Dillion Brewer	Town of Rockwell
Brittany Barnhardt	Town of Granite Quarry
Steve Miller	Town of Spencer
Ron Smith	Town of Harrisburg
Charles Seaford	Town of China Grove
Delores High	Town of East Spencer
Barbara Strang	Cabarrus County
Karen Alexander	City of Salisbury
Mike Tallent	Town of Midland

Others

Phil Conrad	CRMPO Director
Theo Ghitea	NCDOT Div 10
Pat Ivey	NCDOT Div 9
Scott Miller	NCDOT Div 10
Phillip Craver	NCDOT Div 9
Albert Smith	East Spencer
Bob Bushey	Cabarrus County
Darrell Hinnant	Kannapolis
Tamara Sheffield	Salisbury
Brett Canipe	NCDOT Div 10
Cheryl Sheets	China Grove
Terry Crawford	Concord
Elaine Spaulding	Rowan Chamber
Connie Cunningham	CRMPO Staff

Call to Order

After a dinner hosted by the Town of Spencer was served, the May 24, 2023 meeting of the Cabarrus Rowan MPO TAC was called to order by TAC Vice Chair Brittany Barnhardt. TAC Vice Chair Barnhardt welcomed everyone to the meeting and asked all present to recite the Pledge of Allegiance to a flag displayed. After reciting the pledge, TAC Vice Chair Barnhardt called the roll of eligible voting TAC members and determined that a quorum had been met.

Vice Chair Barnhardt continued by reading the NC State Ethics Commission Ethics Awareness and Conflict of Interest requirement and stated that should a conflict arise during any part of the meeting, members should recuse themselves from that portion of the meeting.

Vice Chair Barnhardt then asked for any Chamber of Commerce updates. Mrs. Elaine Spaulding with the Rowan Chamber addressed the members and invited them to the Mayor's Roundtable/Gov Affairs meeting with Congressman Dan Bishop on June 9, 2023, at 11:00am. Mrs. Spaulding also handed out flyers regarding the upcoming 9th Annual Rowan Chamber Dragon Boat Festival. With no other reports heard, Vice Chair Barnhardt asked if there were any speakers from the floor. With none being heard she moved on to the next order of business.

TAC Vice Chair Barnhardt asked if there were any adjustments to the meeting agenda including the Consent Agenda. Without any adjustments heard Mr. JC McKenzie made a motion to approve the agenda including Consent Agenda as presented. Mrs. Karen Alexander seconded the motion and TAC members voted unanimously to approve.

CONSENT AGENDA

All items on the consent agenda are considered routine and may be enacted by one motion. If a TAC member requests discussion on an item, the item will be removed from the consent agenda and considered separately. The following items were presented for TAC consideration on the Consent Agenda:

NO ITEMS FOR CONSIDERATION

THIS CONCLUDES THE CONSENT AGENDA

Approval of March 22, 2023 Minutes

Vice Chair Barnhardt called members' attention to the minutes from the March 22, 2023 meeting included in their meeting packets. Vice Chair Barnhardt asked if there were any corrections or additions to the minutes. With none being heard, Mr. Charles Seaford made the motion to approve the minutes as presented. Mrs. Barbara Strang seconded the motion and the TAC members followed with a unanimous vote to approve.

Proposed CRP Project Submittal

CRMPO Director Phil Conrad reported to the TAC members that the CRP or Congestion Reduction Program funds are a federal funding source for areas across the state to reduce transportation emissions under the recently enacted Bipartisan Infrastructure Law (BIL). He went on to explain that CRP funds require a local sponsor and a 20 percent local match. Eligible projects must demonstrate a transportation emissions reduction benefit to the local area. The MPO issued a call for new project applications with a deadline of April 28th. Director Conrad went on to state that the CRMPO received a CRP project proposal for the Traffic Signal Central System Improvement Project from the City of Concord.

He continued by calling members' attention to the application and narrative for this project identified as attachment 5A in their packets. He also called attention to Attachment 5B which was a resolution of support. Director Conrad continued by reporting that NCDOT has indicated that the CRMPO can anticipate receiving about \$.5 million annually in CRP funds beginning with FY 2022. Director Conrad reviewed the application with the members. He asked for any questions or comments.

With none heard, Mr. JC McKenzie made a motion to endorse the CRP Project submittal as presented. Mr. Charles Seaford seconded that motion and the TAC members voted unanimously to approve.

DRAFT 2026-2035 TIP Project Call

Director Phil Conrad explained to the TAC members that with the anticipated adoption of the 2024-2033 TIP in June, CRMPO staff has prepared a schedule for identifying and adopting the next STI list for the CRMPO area. The first step was to have a call for new projects (all modes) and the deadline for submitting new projects was May 5, 2023.

Director Conrad then called members' attention to Attachment 6 in their packets that was a list of the nine new projects submitted to date. He reviewed the projects list with the TAC members by using a power point presentation for each project submitted. The review focused on the Town of Mount Pleasant's three sidewalks and one highway. Project. Mrs. Lori Furr made comments to explain their submittals. Director Conrad also reviewed the Town of Granite Quarry's roundabout project with Vice Chair Barnhardt also providing information on this project. Then Director Conrad moved on to the City of Salisbury's two roadway project submittals. Mrs. Karen Alexander with the City of Salisbury provided information on their two projects. Lastly, Director Conrad reviewed the Town of China Grove's submittal for a roundabout project and a Diverging Diamond Interchange project with Mr. Charles Seaford providing additional information for the TAC members. Director Conrad explained this list does not include any holding tank (select), P6.0 carryover, or previous carryover projects that will automatically be evaluated by NCDOT. Director Conrad went on to explain that a list will be provided by NCDOT at a later date.

After review, Director Conrad asked for any questions or comments. With none heard, Mrs. Karen Alexander made a motion to endorse the New TIP Priority projects list for submittal to NCDOT for quantitative review. Mrs. Lori Furr seconded that motion and the TAC members voted unanimously to approve.

Reports/CRMPO Business

1. Local Reports - NCDOT Division 9 & 10 – Mr. Pat Ivey, NCDOT Division 9 reported to the TAC members that Division 9 Updates are included in their meeting packet and that they are up to date. Mr. Brett Canipe, NCDOT Division 10 called TAC members' attention to a spreadsheet of Division 10 project updates. He reviewed some of the projects in Division 10.

2. Cabarrus County Public Transit Performance Management Agreement – Mr. Bob Bushey with Cabarrus County addressed the TAC members and explained what the Public Transit Performance Management Agreement is and why it is needed. Director Conrad called members' attention to a draft copy of the Agreement included in their packets. After Mr. Bushey completed his presentation of the draft Agreement, Mr. Charles Seaford made a motion to approve the draft Agreement. Mrs. Karen Alexander seconded the motion and the TAC members voted unanimously to approve.

Section 5310 Grant Awards – Mr. Bob Bushey with Cabarrus County reported that the County received \$76,364.00 which will be used for senior ADA transportation. Director Conrad reported that Rowan County received \$120,000.00 for preventative maintenance.

3. CMAQ Program Update — Director Conrad called TAC members' attention to an email included in their packets from Mr. Mark Eatman, NCDOT regarding CMAQ projects. Director Conrad reviewed the email and a slide presentation with the members.

4. Special Studies Updates – Director Conrad reported on the status of the Long Ferry Road project in Rowan County and on the completion of the Town of China Grove's Main Street Study in China Grove.

Informational Items

- ✦ RIDER Transit and Salisbury Transit Ridership Information - Phil called the TAC members' attention to the ridership information included in their packets.
- ✦ TPD Newsletter- Included in the meeting packet.
- ✦ SEI Filing Deadline April 17, 2023

Next Meeting : June 28, 2023

Adjournment

With no other business to bring before the TAC, Mrs. Karen Alexander made a motion to adjourn the meeting and Vice-Chair Brittany Barnhardt followed with a second and the meeting was adjourned.

RESOLUTION ADOPTING MODIFICATION #19 TO THE CABARRUS-ROWAN
METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM FOR FY 2020-2029

WHEREAS, the Metropolitan Transportation Improvement Program (MTIP) is a staged multiple year listing of all federally funded transportation projects scheduled for implementation within the Cabarrus-Rowan Urban Area which have been selected from a priority list of projects; and

WHEREAS, the document provides the mechanism for official endorsement of the program of projects by the Transportation Advisory Committee (TAC); and

WHEREAS, the Transportation Advisory Committee has reviewed the current FY 2020-2029 Transportation Improvement Program, dated October 1, 2019, and found the need to modify it;

WHEREAS, the following attached modification has been proposed.

WHEREAS, Projects listed in the MTIP are also included in the State TIP (STIP) and balanced against anticipated revenues as identified in the STIP; and

WHEREAS, the Metropolitan Transportation Plan has a planning horizon year of 2050, and meets all the requirements in 23 CFR 450; and

WHEREAS, the Transportation Advisory Committee has found that the Transportation Improvement Program conforms to the purpose of the North Carolina State Implementation Plan (*or interim emissions tests in areas where no SIP is approved or found adequate*) for maintaining the National Ambient Air Quality Standards in accordance with 40 CFR 51 & 93; and

WHEREAS, the Transportation Advisory Committee has determined that the proposed modification is exempt from the requirements for determining air quality conformity in accordance with 40 CFR 93.127.

NOW THEREFORE, be it resolved by the Cabarrus-Rowan Urban Area Transportation Advisory Committee that the FY 2020-2029 Metropolitan Transportation Improvement Program dated October 1, 2019, for the Cabarrus Rowan Urban Area Metropolitan Planning Organization be modified as listed above on this the 23rd day of August, 2023.

I, Ryan Dayvault, Transportation Advisory Committee Chair, do hereby certify that the above is a true and correct copy of the excerpt from the minutes of a meeting of the Cabarrus-Rowan Transportation Advisory Committee, duly held on the 23rd day of August 2023.

Ryan Dayvault, Chair
Transportation Advisory Committee

**NORTH CAROLINA 2024 – 2033
STATE TRANSPORTATION IMPROVEMENT PROGRAM**

What is a State Transportation Improvement Program (STIP)?

The STIP is a multi-year capital improvement document which denotes the scheduling and funding of construction projects across the state over a minimum 4-year time period as required by Federal law. North Carolina's STIP covers a 10-year period, with the first five years (2024-2028 in this version) referred to as the delivery STIP and the latter five years (2029-2034 in this version) as the developmental STIP. Per 23 CFR 450.216 & 23 U.S. Code § 135 STIP's must also:

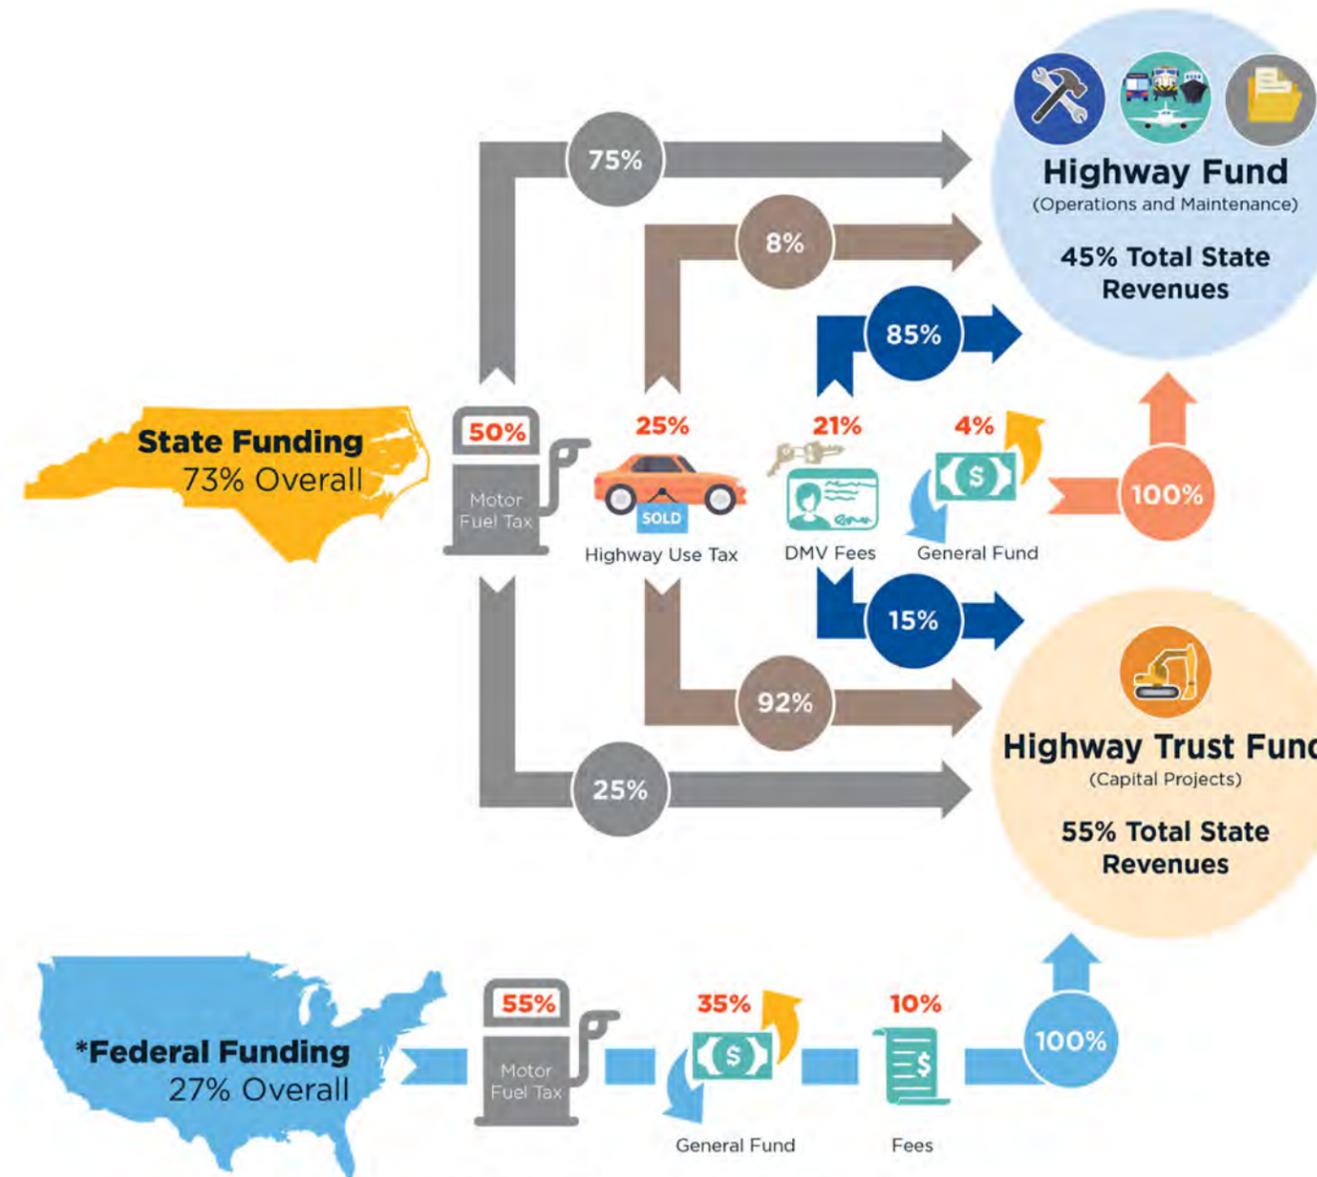

- Be submitted to Federal Highway Administration (FHWA) & Federal Transit Administration (FTA) for approval at least every 4 years
- Be fiscally constrained by year
- Include all capital and non-capital projects using Title 23 USC or Title 49 USC funds, other than certain safety, planning, and research funds
- Include metropolitan TIPs from Metropolitan Planning Organizations
- Provide public comment opportunity on STIP document
- And include the following information:
 - Project description and termini
 - Estimated total cost (NCDOT includes Utility, R/W, and Construction costs)
 - Federal funds to be obligated
 - Responsible agency (such as municipality)

North Carolina's STIP is typically updated every two years (but no later than every four years) and developed in concert with federal and state revenue forecasts, North Carolina Department of Transportation's (NCDOT's) Strategic Prioritization process, preconstruction, and project development timetables, and in adherence with federal and state laws. North Carolina state law requires Board of Transportation (BOT) action to approve the STIP.

This is the fourth STIP developed under the Strategic Transportation Investments (STI) law passed in June 2013. This landmark legislation elevates the use of transportation criteria and the input of local communities to determine project priorities and directs the use of dollars for transportation projects.

Maintenance and Capital Improvement Funding for North Carolina

NCDOT uses three major sources of funds for transportation improvements. Federal Funding and State Highway Trust Funds are used for capital improvements while the Highway Fund is used for maintenance activities. The chart below illustrates these funds and their sources.

* IJA's USDOT FHWA and FTA FFY 2022-23 Allocations

Performance Management Targets

NCDOT has established performance management targets for highway safety (established in the Strategic Highway Safety Plan (SHSP)), transit tier 2 providers that choose to participate in NCDOT's Group Transit Asset Management (TAM) Plan, and performance management targets for infrastructure condition, congestion, system reliability, emissions, and freight movement. The NCDOT anticipates meeting their identified targets with the State funded Highway Maintenance Improvement Program (HMIP) and the mix of projects included in the STIP aided by the Strategic Transportation Investments Prioritization and Programming process. The HMIP is a State funded program of projects that are programmed outside of the STIP. NCDOT collects data and other information at regular time intervals from the transit agencies relative to measure and assess progress toward meeting performance targets.

In North Carolina, pavement and bridge performance is primarily impacted through state funded programs that are managed outside the STIP. The Department's HMIP, identifies planned maintenance activities for a five-year time period, which include pavement, bridge and other general maintenance projects across our entire roadway network. The amount of funding provided through these state funded programs is roughly equivalent to the amount of state and federal funding programmed in the STIP over the same time period. In relation to NHS specific routes, the STIP does include some specific federal funding for interstate pavement and bridge maintenance through our own internal interstate maintenance program. Federal funding for bridges included in the STIP is applied primarily to non-NHS bridges. While the STIP can have an impact to the condition of our NHS pavements and bridges, specifically on the interstate system, the majority of the funding impacting the condition of our pavements and bridges is managed outside the STIP.

Public transit projects included in the STIP align with the transit safety planning and target setting process undertaken by the transit agencies and MPOs. While the North Carolina DOT aided with the development of a template for the initial Public Transportation Agency Safety Plans (PTASPs), each large urban transit provider is responsible for implementing its PTASP, which includes transit safety targets. Investments are made in alignment with PTASPs with the intent of keeping the state's public transit operations, vehicles, and facilities safe and meeting transit safety targets. State and federal funding sources that can be used by transit agencies for operations, vehicles, and facility improvements are outlined in the Public Transportation Project Funding section of the NCDOT 2024-2033 Current STIP. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

How is the STIP organized?

The STIP contains funding information and schedules for transportation modes and programs including: Highways, Aviation, Bicycle and Pedestrian, Ferry, Public Transportation, Rail, Governor's Highway Safety and statewide related programs. The Appendix also contains a reference list of completions and deletions since the 2020-2029 STIP which was approved in 2019.

The transportation program in the STIP is organized in an Excel file that can be sorted and filtered as needed by the reader. The information included for each project includes details on the location of the project: County, NCDOT Highway Division, Route, Description, and Planning Organization. Projects also list the STI category they are funded from, i.e., by Statewide Mobility, Regional Impact, or Division Needs. The phases of projects (such as Right of Way (R), Utility relocation (U), and Construction (C) are listed by Fiscal Year along with their costs and anticipated funding sources. For those projects with their first phase of work beginning in the second half of the STIP (years 2029-2033), they are listed as "Funded for Preliminary Engineering Only." The Department will begin Preliminary Engineering activities (environmental documentation and design work) at the appropriate time, but the project will need to compete for funding in a future round of Prioritization and therefore the funding years for phases are unknown at this time. (See next section titled "Strategic Prioritization" for details on project prioritization.)

All projects require extensive planning, environmental impact and design studies. The location and exact type of improvements are subject to refinement and modification during the planning and design phases.

Strategic Prioritization

The Department manages a strategic project prioritization process known as Prioritization. Strategic prioritization uses transportation data, input of local government partners, and the public to generate scores and ultimately rankings of projects across the state. Multiple public input opportunities were provided during the spring and summer of 2020 regarding the submittal of new projects assisting each Metropolitan Planning Organization (MPO), Rural Planning Organization (RPO), and NCDOT's transportation Divisions.

The P6.0 process (the most recent generation of Prioritization) was organized similarly to previous prioritization cycles and resulted in each transportation mode using different quantitative criteria, measures, and weights to provide technical scores for projects as recommended by the Prioritization Workgroup and approved by the NC Board of Transportation. Also, per the intent of STI for transportation modes to compete for funding, a normalization process was recommended to create minimum percentages of funding for highway and non-highway projects in the combined Regional Impact and Division Needs categories. The minimum percentage for highways was 90% and minimum percentage for non-highways was 4%. These percentages guided the programming process, which ultimately yielded a 95% to 5% highway vs non-highway programmed amount in the combined Regional Impact and Division Needs categories.

P6.0 Highway Criteria & Weights:

Mobility Projects (Roadway Widening, Intersection/Interchange Improvements, Access Management):

Statewide Mobility		Regional Impact		Division Needs	
30%	Congestion	20%	Benefit-Cost	15%	Benefit-Cost
25%	Benefit-Cost	20%	Congestion	15%	Congestion
25%	Freight	10%	Accessibility/Connectivity	10%	Safety
10%	Economic Competitiveness	10%	Freight	5%	Accessibility/Connectivity
10%	Safety	10%	Safety	5%	Freight

Modernization Projects (Modernize Roadway, Upgrade Freeway to Interstate):

Statewide Mobility		Regional Impact		Division Needs	
25%	Freight	25%	Safety	20%	Safety
25%	Safety	10%	Freight	10%	Pavement Condition
20%	Paved Shoulder Width	10%	Lane Width	10%	Paved Shoulder Width
10%	Congestion	10%	Pavement Condition	5%	Freight
10%	Lane Width	10%	Paved Shoulder Width	5%	Lane Width
10%	Pavement Condition	5%	Congestion		

P6.0 Aviation Criteria & Weights

Statewide Mobility		Regional Impact		Division Needs	
40%	NCDOA Project Rating	30%	NCDOA Project Rating	25%	NCDOA Project Rating
30%	FAA ACIP Rating	15%	Benefit/Cost	10%	Benefit/Cost
20%	Benefit/Cost	15%	FAA ACIP Rating	10%	FAA ACIP Rating
10%	Constructability Index	10%	Constructability Index	5%	Constructability Index

P6.0 Bicycle/Pedestrian Criteria & Weights

Statewide Mobility		Regional Impact		Division Needs	
(not eligible)	(not eligible)	20%	Safety		
		15%	Accessibility/Connectivity		
		10%	Demand/Density		
		5%	Cost Effectiveness		

P6.0 Ferry Criteria & Weights

Statewide Mobility		Regional Impact		Division Needs	
(not eligible)	(not eligible)	20%	Capacity/Congestion	15%	Asset Condition
		15%	Asset Condition	15%	Asset Efficiency
		15%	Asset Efficiency	10%	Accessibility/Connectivity
		10%	Accessibility/Connectivity	10%	Benefits
		10%	Benefits		

P6.0 Public Transportation Criteria & Weights (Demand Response Projects)

Statewide Mobility		Regional Impact		Division Needs	
(not eligible)	(not eligible)	25%	Cost Effectiveness	15%	Cost Effectiveness
		20%	Demand/Density	15%	Demand/Density
		15%	Efficiency	10%	Efficiency

		10%	Efficiency

P6.0 Rail Criteria & Weights

Statewide Mobility	Regional Impact	Division Needs	
35%	Benefit-Cost	15%	System Opportunities
30%	Safety	10%	Benefit-Cost
15%	System Opportunities	10%	Capacity and Diversion
10%	Capacity and Diversion	10%	Safety
10%	Economic Competitiveness	5%	Economic Competitiveness

Due to rising costs for projects funded in the previously adopted 2020-2029 STIP, little to no funding was projected to be available for new projects in the 2024-2033 STIP timeframe. Therefore, on August 4, 2021, the Prioritization Workgroup recommended, and the N.C. Board of Transportation approved, the P6.0 prioritization cycle be halted. The decision was made to develop the 2024-2033 STIP using existing projects from the previously adopted 2020-2029 STIP. The conclusion of the P6.0 cycle was the release of the quantitative scores and the local input point procedure was halted. The P6.0 Workgroup was reconvened to finalize the methodology and procedures used for this one-time STIP development exception and the N.C. Board of Transportation approved the process. Projects with current construction schedules in the first three years (2024-2027), projects with right-of-way actively underway, and those with federal grants were programmed first; followed by a seniority approach of combined factors as oldest Prioritization cycle and highest scoring projects. There were no newly submitted projects from the P6.0 prioritization cycle included in the 2024-2033 STIP.

Figure A

However, it does not necessarily mean that projects will be scheduled in the STIP in the order of their score and rank. There are other considerations and factors in developing the actual program (Figure A). A major factor in deciding when the top scoring projects are funded is project delivery time. Projects need to fulfill a series of environmental and preliminary engineering requirements, right-of-way must be purchased, utility relocation (where applicable) must be addressed, and final plans must be developed for lettings. The time period to accomplish these activities can be lengthy. Construction funding cannot be allocated to projects before these preconstruction activities have taken place.

There were also STI law provisions (including a corridor cap and individual modal caps) which directed programming decisions and the entire program had to meet budget tests and fiscal constraint per state and federal requirements. STI law also included a provision to exempt from prioritization select projects (Transition Period Projects) scheduled to be obligated for construction prior to July 1, 2015. In addition, projects funded for right-of-way or construction in the first 6 years of the previous 2020-2029 STIP, were considered committed (now called "Scheduled for Delivery") and were not evaluated in P6.0. However, the funding required for both the transition and committed projects was accounted for when budgeting for other projects.

Public Involvement – Draft STIP

After the release of the Draft STIP in August 2022, each of NCDOT’s 14 transportation divisions hosted a weeklong open house between September 1, 2022 and October 28, 2022. The purpose of these open houses was to inform citizens about projects in the Draft STIP and collect feedback. Additionally, multiple public input opportunities were available ahead of the development of the Draft STIP including the STI implementation process.

Each open house allowed participants to study maps of projects in the Draft STIP and review proposed project schedules and information with Department staff. Sessions were held in transit accessible locations and the Department provided auxiliary aids for participants under the Americans with Disabilities Act as well as special services for English limited participants. Consultation was conducted with stakeholder groups throughout North Carolina via emails and direct mailing to encourage participation via multiple feedback options. In addition, the department provided the ability for citizens to take an online survey as well as provide comments online, by phone or mail.

Transportation Conformity

On February 16, 2018, the United States Court of Appeals for the District of Columbia Circuit in *South Coast Air Quality Mgmt. District v. EPA* (“South Coast II,” 882 F.3d 1138) held that transportation conformity determinations must be made in areas that were either nonattainment or maintenance for the 1997 ozone national ambient air quality standard (NAAQS) and attainment for the 2008 ozone NAAQS when the 1997 ozone NAAQS was revoked. These conformity determinations are required in these areas after February 16, 2019. The Research Triangle Region, the Rocky Mount Region were “maintenance” at the time of the 1997 ozone NAAQS revocation on April 6, 2015 and were also designated attainment for the 2008 ozone NAAQS on May 21, 2012. Therefore, the Research Triangle Region, the Metrolina Region, and the Rocky Mount Region will make their conformity determinations as per the 1997 ozone NAAQS on their MTPs and their 2024-2033 TIP. The Metrolina Region will also make their conformity determinations as per the 2008 ozone NAAQS on their MTPs and their 2024-2033 TIP.

Each MPO is required to develop a 20+ year Metropolitan Transportation Plan (MTP). In MPOs that are listed as either a non-attainment or maintenance air quality area, Transportation Conformity must be demonstrated on all plans, projects and TIPs. This ensures that transportation projects that receive federal funding conform to the intent of the air quality State Implementation Plan (SIP). Projects must be grouped by horizon year and the travel demand model must be run for each horizon year. From the travel demand model, speeds and Vehicle Miles Traveled (VMT) are obtained and used in the air quality model to calculate emissions that are compared to the budgets approved by the US Environmental Protection Agency (EPA). As long as the calculated emissions are less than the budget, the area can make a conformity finding. If the area cannot meet the budget, then the MPO’s project list does not meet the transportation conformity test and the area may be subject to lapse. A lapse can delay projects as federal actions cannot take place during a lapse and only exempt projects can move forward. A revised Transportation Conformity analysis can be triggered whenever a project is delayed or accelerated such that it crosses a horizon year. Whenever an MPO develops a new MTP, a new conformity analysis must be performed. When a new TIP comes out, the new TIP must be checked to make sure it is consistent with the MTP. If there is any inconsistency between the TIP and the MTP (conformity finding) then FHWA cannot take any federal action including approval of the TIP until this inconsistency is resolved.

On February 16, 2018, the United States Court of Appeals for the District of Columbia Circuit in the *South Coast Air Quality Mgmt. District v. EPA* case (“South Coast II,” 882 F.3d 1138) held that transportation conformity determinations must still be made in areas that were either nonattainment or maintenance for the 1997 ozone national ambient air quality standard (NAAQS) and attainment for the 2008 ozone NAAQS when the 1997 ozone NAAQS was revoked. However, these conformity determinations may be made without the requirement of a Regional Emissions Analysis (REA) and comparison to the emission budgets approved by the US EPA. Consistency between the TIP and MTP must still be ensured.

North Carolina 2008 Ozone Maintenance Area Requiring a REA

Public Transportation Project Funding

The projects listed in the STIP are funded from various Federal Transit Administration (FTA), Federal Highway Administration (FHWA) and North Carolina State Funds, many requiring a state and/or local funding match. Annually, the NCDOT Integrated Mobility Division (IMD) provides state funds to assist in meeting these match requirements. The amount available for state match is limited to the amount appropriated by the General Assembly.

FTA program funding apportionment amounts are published annually in the Federal Register and posted to the FTA website. NCDOT uses these apportionments to allocate funding to qualifying sub-recipients. Most FTA funding apportioned to urbanized areas with a population of 200,000 or greater is managed directly by the MPO or transit agency. The MPO develops projects that appear in the STIP, using, in part, funds received directly from FTA. NCDOT IMD allocates federal funds to small urban areas less than 200,000 population and rural, non-urbanized areas of the state. MPOs and NCDOT IMD develop projects and programs that appear in the STIP using appropriated and apportioned federal and state funding amounts, including unobligated prior year funding. Amendments or modifications are made to the STIP for transit projects when the funding amount changes from the amount contained in the approved STIP.

The following Federally funded programs appear in the STIP:

A. Metropolitan Planning and Statewide Planning Program (Section 5303 / 5304)

Provides funding and procedural requirements for multimodal transportation planning in metropolitan areas and states that are cooperative, continuous and comprehensive, resulting in long-range plans and short-range programs that reflect transportation investment priorities. These planning programs are jointly administered by FTA and the FHWA, which provides additional funding to MPOs.

IMD Goals:

- 5303 – Create a fair and equitable distribution of planning funds to urbanized areas (UZAs) and foster transit planning on a regional and inter-regional scale.
- 5304 – Provide for statewide planning and technical studies.

B. Urban Area Formula Program (Section 5307)

Makes Federal resources available to qualifying areas for transit capital, operating assistance, and transportation planning in MPOs and urbanized areas with a population of 50,000 or more as designated by the U.S. Department of Commerce, Bureau of the Census.

IMD Goals:

- 5307 Governor's Apportionment (GA) – Work with small, urbanized areas to offer technical assistance, as needed. Section 5307 grants are managed by the FTA direct recipient in these small, urbanized areas.
- 5307 Large Urbanized Areas – Work with large urbanized areas for technical assistance, as needed.

C. Enhanced Mobility of Seniors and Individuals with Disabilities Program (Section 5310)

Improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options. This program supports transportation services planned, designed, and carried out to meet the special transportation needs of seniors and individuals with disabilities in all areas – large urbanized (over 200,000 population), small urbanized (50,000-200,000 population), and rural (under 50,000 population). Eligible projects include both traditional capital investment and nontraditional operational assistance investment beyond the Americans with Disabilities Act (ADA) complementary paratransit services.

IMD Goal:

- Support transportation of seniors and persons with disabilities in small, urbanized areas (50,000-200,000 population) and rural North Carolina (less than 50,000 population).

D. Rural Formula Grant Program (Section 5311)

Provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations of less than 50,000, where many residents often rely on public transit to reach their destinations. The program also provides funding for state and national training and technical assistance through the Rural Transportation Assistance Program (RTAP), Intercity Bus (5311(f)) and Appalachian Development Transportation Assistance Program. North Carolina is one of 13 states receiving the Appalachian Development grants in the following 29 counties: Alexander, Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Cherokee, Clay, Davie, Forsyth, Graham, Haywood, Henderson, Jackson, McDowell, Macon, Madison, Mitchell, Polk, Rutherford, Stokes, Surry, Swain, Transylvania, Watauga, Wilkes, Yadkin, and Yancey.

IMD Goals:

- Support general public transportation in rural North Carolina (less than 50,000 population) and provide a coordinated transportation network.
- Enhance access in rural areas to health care, shopping, education, employment, public services and recreation.
- Encourage the most efficient use of transportation funds to provide passenger trips in rural areas through coordination of programs and services.

E. Bus and Bus Facilities Program (Section 5339)

Provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

IMD Goal:

- Support the small urban and statewide funding program to provide capital funds to replace, rehabilitate and purchase buses and related equipment and construct bus-related facilities.

F. Public Transportation Safety Program – State Safety Oversight (Section 5329)

Provides funds for program operational and administrative expenses, including employee training activities. This funding is provided to North Carolina to support the rail fixed guideway public transportation systems in the City of Charlotte. This funding is administered by the NCDOT Rail Division.

IMD Goal:

- Provide any needed technical assistance and support to the NCDOT Rail Division as it administers these funds.

G. State of Good Repair (Section 5337)

Provides capital funds for maintenance, replacement and rehabilitation projects of high-intensity fixed guideway and bus systems to help transit agencies maintain assets in a state of good repair. Additionally, State of Good Repair grants are eligible for developing and implementing Transit Asset Management Plans. This funding is apportioned directly to the systems in the State with fixed guideway systems. This FTA funding is not administered by IMD.

H. Capital Investment Grant (CIG) Program (Section 5309)

The FTA discretionary grant program funds transit capital investments, including heavy rail, commuter rail, light rail, streetcar and bus rapid transit. Federal transit law requires transit agencies seeking CIG funding to complete a series of steps over several years. For New Starts and Core Capacity projects, the law requires completion of two phases in advance of receipt of a construction grant agreement – Project Development and Engineering. For Small Starts projects, the law requires completion of one phase in advance of receipt of a construction grant agreement – Project Development. This FTA funding is not administered by IMD.

Project Descriptions

EPA's Transportation Conformity Regulation states "The degree of specificity required in the transportation plan and the specific travel network assumed for air quality modeling do not preclude the consideration of alternatives in the NEPA process of other project development studies." In an effort to not unduly influence the outcome of NEPA studies the STIP has used fairly generic descriptions of proposed work although the cost estimates were derived from specific future cross sections. In future documents, more specific descriptions will be used as the NEPA process determines a preferred alternative. So, while the out years 6 through 10 may use a description like "widen to multi-lanes" as the NEPA process defines a recommended cross section this may become "widen to 4 lane median-divided cross section" as the project comes closer to having right of way and construction actually funded.

PROGRAM BUDGETS

Transportation Revenue Forecast

State Budget

State transportation revenues are derived from four sources: user fees in the form of Motor Fuel Tax (MFT), driver and vehicles fees collected by the NC Division of Motor Vehicles (DMV Fees), a Highway Use Tax (HUT) on vehicle title transfers, and a portion of the state sales tax proceeds. Federal transportation revenues are derived from a federal MFT tax, commercial vehicle fees, and transfers from the U.S. General Fund. North Carolina's total transportation funding consists of roughly 75 percent state revenues and 25 percent federal revenues.

State revenue projections are developed using a consensus forecast process by the Office of State Budget and Management (OSBM), Legislative Fiscal Research Division, and NCDOT. Budget estimates developed for the Governor's biennial budget serve as a base from which NCDOT and OSBM staff develop the forecast for the remaining years. The OSBM and NCDOT forecasts are produced using numerous data sources, but largely rely on economic data and research produced by S&P Global, a private financial forecasting company and in-house consumption forecasting models, and internal historical data. Motor fuel tax revenues are forecast using crude oil prices, and estimates for consumption, fuel efficiency, and miles travelled. Highway Use Tax (HUT) revenue forecasts are based on historical data and predicted values for new and used vehicle transactions and vehicle price. Sales tax revenue forecasts rely on economic measures, such as gross national product (GNP), personal income, and the consumer price index (CPI). DMV fee revenue forecasts are based on historical transactional information, such as vehicle registration and licensed driver data, and OSBM population projections. DMV title fee estimates are obtained using licensed driver and vehicle registration data. The number of vehicle transactions, vehicle price, motor fuel consumption, the purchase of goods and services, and sales tax revenues correlate strongly with economic conditions. Generally, DMV fees correlate with projected changes in population. Title fees closely correlate to forecasted changes in vehicle sales.

The motor fuel tax rate is adjusted annually based on a variable rate formula that measures changes in population and the Consumer Price Index for Energy (CPI-E). Effective January 1, 2023, the motor fuel tax rate is 40.5 cents per gallon. DMV fees are adjusted every four years based on changes in the CPI. HUT and sales tax rate changes are made by acts of the North Carolina General Assembly.

Federal Budget

After a one-year extension of the Fixing America's Surface Transportation Act, or "FAST Act", President Biden signed into law the five-year \$1.2 trillion Infrastructure Investment and Jobs Act (IIJA) on November 15, 2021. The IIJA largely maintains current program structures and funding shares between highways and transit, but it includes significant expansions in funding, new discretionary and competitive grant programs, and two new formula programs. The law emphasizes the goals of creating a resilient, efficient, safe, and connected transportation system. The formula programs are:

- National Highway Performance Program (NHPP)
- Surface Transportation Block Grant Program (STBG)
- Congestion Mitigation and Air Quality Improvement Program (CMAQ)
- Highway Safety Improvement Program (HSIP)
- Railway-Highway Crossings (subset of the HSIP)
- Metropolitan Planning
- Construction of Ferry Boats and Ferry Terminal Facilities
- Transportation Alternatives (TA)
- National Highway Freight Program
- Carbon Reduction Program
- PROTECT Program
- Bridge Program
- National Electric Vehicle Formula Program

Federal transportation funding is distributed by USDOT based on Congressional multi-year reauthorization bills and annual appropriation acts. The federal MFT rate, set by Congress in 1993, is 18.4 cents per gallon for gasoline and 24.4 cents per gallon for diesel fuel. Unlikely prior multi-year reauthorization bills, the IIJA legislation was approved by Congress using record General Fund transfers and advanced appropriations which have been assumed to be partially continue past the expiration of IIJA in federal FY 2026.

Federal Aid Program

The Federal Aid Program consists of many funding categories. Funding in most of these individual categories is subject to overall federal budget constraints and Federal Obligation Limitation. The obligation limitation effectively limits the amount of federal funds that can be utilized in any one year.

North Carolina’s availability of federal funds for the STIP is expected to be about \$1,497 million in FY 2024 and \$1,522 in FY 2025.

Virtually all federal-aid projects require a local or state fund contribution. Most highway and transit programs require a 20% local or state share. The amount of matching funds needed for the Federal Aid Program is expected to be approximately \$359 million in FY 2024 and \$365 million in FY 2025, most of which will be funded by the State Highway Trust Fund.

During the balancing of the State Transportation Improvement Program (STIP), the program is fiscally constrained to the amount of funds projected to be available each year to prevent the Department from over committing future revenues. NCDOT extensively uses "Advance Construction" (AC), which allows states to begin a project even in the absence of sufficient federal-aid obligation authority to cover the federal share of project costs. It is codified in Title 23, Section 115. Advance Construction eliminates the need to set aside full obligational authority before starting projects. As a result, a state can undertake a greater number of concurrent projects than would otherwise be possible. In addition, Advance Construction helps facilitate construction of large projects, while maintaining obligational authority for smaller ones.

Prior to authorizing a project (or phase of a project), a federal agency is typically required to obligate the total amount of funds needed to complete the project (or phase). So, if NCDOT plans to construct a project estimated to cost \$40 million without using Advance Construction, Federal Highway Administration (FHWA) would need to obligate their full share, typically 80 percent, or \$32 million; even though some of those funds will not be needed for several years.

Advance Construction allows FHWA to authorize the project without obligating the funds needed to complete the project. Under an Advance Construction authorization, FHWA does not commit the federal government to funding the project but makes the project eligible for reimbursement at a later date as federal funds become available.

As an Advance Construction project progresses, NCDOT will obligate federal funding and bill FHWA for expenditures that have occurred (typically at 80 percent). For instance, if after a year of construction, the \$40 million construction project described above has \$10 million of expenditures and federal funds are available, NCDOT may obligate \$8 million of federal funds and send FHWA a bill for \$8 million.

In March 2021, NCDOT developed a policy to govern the use of Advance Construction. This policy requires a yearly analysis of the Advance Construction program to ensure that the use of Advance Construction is within prescribed limits. The results of this analysis are posted on the Department's website and reported to the Board of Transportation.

When analyzing Advance Construction usage at NCDOT, a distinction is made between Advance Construction used for Grant Anticipation Revenue Vehicles (GARVEE) bonded projects and non-GARVEE traditional Advance Construction projects. GARVEE is a type of bond or similar financing method used by a state to finance transportation projects and is a specific type of Advance Construction. Outstanding GARVEE debt is considered in the yearly Advance Construction analysis by reserving the funds that are needed to make the bond payments. However, GARVEE AC balances should be viewed differently since they are long-term well-defined commitments. The North Carolina General Assembly has imposed restrictions on the use of GARVEE to ensure that the Department's use of this funding technique remains within reasonable levels. Prior to the issuance of GARVEE bonds, the limits imposed by the General Assembly are checked to ensure that the Department will remain in compliance. State law constrains the total amount of GARVEE debt such that the total GARVEE outstanding principal amount cannot exceed the previous year's total federal budget authorization, or the debt service cannot exceed 20 percent of anticipated annual future federal revenues.

Since non-GARVEE Advance Construction is more fluid, a yearly analysis is required by the Department's Advance Construction policy. The Advance Construction levels for non-GARVEE projects are subject to the following two limits:

- Amount of unreimbursed state funds expended (by funding source) should not exceed 1 year of federal apportionments.
- AC balance (by funding source) should not exceed 4 years of anticipated federal apportionments.

The table on the following page provides the projected non-GARVEE balances for FY 2024 through FY 2027 in the two largest categories, National Highway Performance Program (NHPP) and Surface Transportation Block Grant Program (STBG) as well as our Highway Safety Improvement Program (HSIP).

	National Highway Performance Program				Surface Transportation Block Grant				Highway Safety Improvement Program			
	2024	2025	2026	2027	2024	2025	2026	2027	2024	2025	2026	2027
AC Beginning Balance	\$1,522,260	\$1,734,495	\$1,541,759	\$1,612,635	\$566,126	\$891,080	\$1,033,705	\$890,095	\$149,689	\$149,689	\$149,689	\$149,689
New AC in STIP	\$865,804	\$460,794	\$724,756	\$238,944	\$691,316	\$510,074	\$228,551	\$285,129	\$56,365	\$56,365	\$56,365	\$56,365
AC Converted	\$653,569	\$653,530	\$653,880	\$653,678	\$366,361	\$367,449	\$372,161	\$371,471	\$56,365	\$56,365	\$56,365	\$56,365
AC Ending Balance	\$1,734,495	\$1,541,759	\$1,612,635	\$1,197,901	\$891,080	\$1,033,705	\$890,095	\$803,753	\$149,689	\$149,689	\$149,689	\$149,689

NOTE: Dollars in thousands and exclude GARVEE.

GARVEE Bonds

In 2005, House Bill 254 authorized NCDOT to issue Grant Anticipation Revenue Vehicles (GARVEE bonds) to finance federal aid highway projects. All funds derived from GARVEE bonds are backed by the receipt of future federal funds and no state funds may be committed to the debt service. Below is a summary of the GARVEE bond issuances and debt service requirements.

GARVEE Bond Program (\$ in Millions)

State Fiscal Year	Proceeds Including Premium	Debt Service
2008	\$299.80	\$5.06
2009		59.33
2010	263.14	67.16
2011		82.00
2012	364.9	59.84
2013		86.33
2014		86.33
2015	300.54	86.32

2032		79.79
2033		79.80
2034		79.80
2035		22.70
2036		22.70

BUILD NC Bonds

In 2018, Senate Bill 758 authorized NCDOT to issue Build NC bonds to finance highway projects at the regional impact and divisional need project categories. Subject to appropriation by the General Assembly, funds from the Highway Trust Fund shall be the source for repayment of debt service. Below is a summary of Build NC bond debt service requirements.

BUILD NC Bond Program (\$ in Millions)

State Fiscal Year	Proceeds Including Premium	Debt Service
2019	\$357.34	
2020		28.18
2021	848.69	69.26
2022	334.01	93.04

2035		93.26
2036		28.39
2037		28.39

State Highway Trust Fund

Revenues for the Trust Fund are generated from state motor fuels tax, the highway use tax (transfer of motor vehicle titles), DMV titles and other fees, sales tax transfer from the general fund and interest income (as shown in the graphic on page T-2). \$49 million of Trust Fund revenues are transferred each year to the NCTA for project funding, as well as \$45 million to the State Ports.

The STIP budget is based on a consensus forecast by the OSBM, Legislative Fiscal Research Division, and NCDOT. These estimates were used to develop the draft program and are the basis for air quality and fiscal constraint tests. The Trust Fund revenues are projected to be about \$2.2 billion for FY 2024 and \$26.3 billion during the 10-year period. Of this \$26.3 billion in revenue, \$490 million goes to NCTA, \$611.6 million is used for program administration, \$4 million is transferred to the Highway Fund for Visitor Centers and \$450 million is transferred to State Ports. The remaining \$24.8 billion is available for STIP purposes. After preliminary engineering, the state match for federal planning (SPR) funds, inflation, and bonus allocation, \$19.4 billion is available for programming.

Anticipated Inflation Impact

Inflation is not explicitly factored into the above revenue estimates. However, before programming projects in the STIP, available funds were reduced to account for future inflation. NCDOT uses a 3% per year inflation factor. The 3% was compounded annually for the first five years, then held constant for the last five years. In the first year (2024), ½ of the inflation rate was used (1.5%) to ramp up to the 3% in year 2 (2025). This allows project costs used in the Program to be shown in current (2024) dollars.

State Highway Fund

Revenues for the Highway Fund are generated from the state motor fuels tax and DMV fees. The Highway Fund primarily supports projects that maintain the state's existing transportation system. This includes general maintenance, roadside environmental activities, resurfacing highways, replacing bridges, paving unpaved secondary roads, and state aid to municipalities. Funds are distributed across North Carolina based on need.

Cash Model and Fiscal Constraint of the STIP

In a traditionally financed federal-aid highway project, the FHWA approves the project and obligates (promises to pay) federal funds (typically 80 percent of eligible costs) at the start of a contract. The Department then begins construction, pays construction costs with state funds, and submits weekly federal reimbursement requests to FHWA. However, at its discretion, NCDOT may also use a funding technique called Advance Construction. In Advance Construction, the FHWA only approves a project as being eligible for federal funding and does not obligate (promise to pay) federal funds at the start of a project. The Department then begins construction, pays construction costs with state funds, submits a request to obligate an amount of federal funds necessary for reimbursement of a percentage of eligible costs (typically 80 percent), and submits a request for reimbursement to FHWA.

NCDOT heavily utilizes Advance Construction because it allows the Department to accelerate projects by undertaking a greater number of concurrent federal-aid projects than would otherwise be possible. However, when Advance Construction is utilized, care must be taken to ensure that adequate funds will be available to implement the schedule of projects included in the STIP. NCDOT relies on its cash model to insure fiscal constraint of both the STIP and its entire operation. The Department uses a cash model to manage its operation on a cash-flow basis using statistical models that were developed specifically to support NCDOT programs. The models are used to forecast future cash demands and financial capacity.

North Carolina's General Assembly in §143C:6-11 dictates that the Department's cash target to be between 15% and 20% of the total appropriations from the Highway Fund and Highway Trust Fund for the current fiscal year. Any federal funds on hand shall not be considered as cash for this purpose. The target shall include an amount necessary to make all municipal-aid funding requirements. Also, NCGS §143C:6-11 requires the minimum cash balance from the Highway Fund and Highway Trust Fund to be at least 7.5% of the total appropriations for the current fiscal year. If this minimum is not maintained, no further transportation project contract commitments may be entered into until the cash balance has been regained. The Department may modify or supplement transportation contract commitments for existing transportation projects that (i) results in a savings from the total estimated project cost of the existing commitment, based on cost-savings analysis, or (ii) relate to the needs of an existing transportation project to continue. Any federal funds on hand shall not be considered as cash for the purpose of the minimum cash balance requirement.

The North Carolina Turnpike Authority (NCTA)

NCTA is a public agency of the State of North Carolina located within NCDOT. NCTA's mission is to supplement the traditional non-toll transportation system serving the citizens of North Carolina by accelerating the delivery of roadway projects using alternative financing options and facilitating the development, delivery, and operation of an integrated system of toll roads. The Triangle Expressway, North Carolina's first modern toll facility is approximately 18.8 miles of new highway construction, extending the partially complete "Outer Loop" around the greater Raleigh area from I-40 in the north to the NC 55 Bypass in the south opening fully to traffic on January 2, 2013. The Monroe Expressway, the second all electronic toll facility in North Carolina, opened to traffic on November 27, 2018. The Monroe Expressway is approximately 19.8 miles of new highway construction that serves as a bypass to U.S. 74 from I-485 in eastern Mecklenburg County to U.S. 74 between the towns of Wingate and Marshville in Union County. Since the STI law passed in June 2013, the identification of potential Turnpike projects has fallen under the strategic project prioritization process. Funding for Turnpike projects may be derived from a combination of State transportation revenues, Federal aid dollars, and toll revenue bonds.

Total revenues for the Triangle Expressway were \$54.0 million and \$39.1 million for FY 2022 and FY 2021, respectively. FY 2022 total revenues increased by 38.3% year-over-year (YOY) when compared to FY 2021. Operating expenses for the Triangle Expressway totaled \$14.1 million and \$13.9 million for FY 2022 and FY 2021, respectively. FY 2022 operating expenses increased by 1.7% YOY from the previous year.

Total revenues for the Monroe Expressway were \$27.0 million and \$21.0 million for FY 2022 and FY 2021, respectively. FY 2022 total revenue increased by 29.0% YOY when compared to FY 2021. Operating Expenses for the Monroe Expressway totaled \$12.5 million and \$11.2 million for FY 2022 and FY 2021, respectively. FY 2022 operating expenses increased by 11.8% YOY from the previous year.

1.0 Introduction

The concept of transportation conformity was introduced in the Clean Air Act (CAA) of 1977, which included a provision to ensure that transportation investments conform to a State implementation plan (SIP) for meeting the Federal air quality standards. Conformity requirements were made substantially more rigorous in the CAA Amendments of 1990. The transportation conformity regulations that detail implementation of the CAA requirements were first issued in November 1993, and have been amended several times. The regulations establish the criteria and procedures for transportation agencies to demonstrate that air pollutant emissions from metropolitan transportation plans, transportation improvement programs and projects are consistent with (“conform to”) the state’s air quality goals in the SIP. This document has been prepared for state and local officials who are involved in decision making on transportation investments.

Transportation conformity is required under CAA Section 176(c) to ensure that Federally supported transportation activities are consistent with (“conform to”) the purpose of a state’s SIP. Transportation conformity establishes the framework for improving air quality to protect public health and the environment. Conformity to the purpose of the SIP means Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) funding and approvals are given to highway and transit activities that will not cause new air quality violations, worsen existing air quality violations, or delay timely attainment of the relevant air quality standard, or any interim milestone.

In 1997, the national ambient air quality standard (NAAQS) for ozone was reviewed and revised to reflect improved scientific understanding of the health impacts of this pollutant. When the standard was revised in 1997, an 8-hour ozone standard was established that was designed to replace the 1-hour standard. The US Environmental Protection Agency (USEPA) designated the Metrolina Area as moderate non-attainment for ozone under the 8-hour standard with an effective date of June 15, 2004. The designation covered the following geographic areas:

- Cabarrus County
- Gaston County
- Lincoln County
- Mecklenburg County
- Rowan County
- Union County
- Coddle Creek and Davidson Townships in Iredell County

On March 28, 2013, the North Carolina Division of Air Quality (NCDAQ) submitted the final *"Supplement for Redesignation Demonstration and Maintenance Plan for the Charlotte-Gastonia-Rock Hill, NC-SC 1997 8-hour Ozone Nonattainment Area"* to the USEPA. The supplement documents the Metrolina Area attaining the 1997 8-hour ozone NAAQS and fulfilling the requirements of Section 175A(b) of the Federal Clean Air Act as amended. The USEPA took final

action on December 2, 2013 to redesignate the Metrolina Area to attainment for the 1997 8-hour ozone NAAQS with an effective date of January 2, 2014.

On May 27, 2008, the USEPA once again revised the ozone NAAQS to provide increased protection of public health and welfare especially for children and “at risk” populations. As a result of the new ozone NAAQS, the Metrolina Area was designated by the USEPA as marginal nonattainment for the 2008 8-hour ozone NAAQS on May 21, 2012. The designated area for the 2008 8-hour ozone NAAQS include,

- Central Cabarrus, Concord, Georgeville, Harrisburg, Kannapolis, Midland, Mount Pleasant, Odell, Poplar Tent, New Gilead and Rimertown Townships in Cabarrus County
- Dallas, Crowders Mountain, Gastonia, Riverbend and South Point Townships in Gaston County
- Coddle Creek and Davidson Townships in Iredell County
- Catawba Springs, Lincolnton and Ironton Townships in Lincoln County
- Mecklenburg County
- Atwell, China Grove, Franklin, Gold Hill, Litaker, Locke, Providence, Salisbury, Steele and Unity Townships in Rowan County
- Goose Creek, Marshville, Monroe, Sandy Ridge and Vance Townships in Union County.

The NCDAQ submitted the *"Redesignation Demonstration and Maintenance Plan for the Charlotte-Gastonia-Salisbury, North Carolina 2008 8-Hour Ozone Marginal Nonattainment Area"* to the USEPA on April 16, 2015. In the redesignation demonstration and maintenance plan, the maintenance demonstration was estimated using a Reid vapor pressure (RVP) of 7.8 psi. On May 21, 2015, the USEPA proposed to determine the Metrolina Area was attaining the 2008 8-hour ozone standard, approve the 2014 and 2026 motor vehicle emissions budgets (MVEBs) and redesignate the Metrolina Area to attainment for the 2008 8-hour ozone standard. The USEPA approval and final rule redesignating the Metrolina Area from nonattainment to attainment was signed on July 17, 2015.

On April 16, 2015, the NCDAQ also submitted to the USEPA the *"Clean Air Act Section 110(l) Non-Interference Demonstration to Support the Gasoline Reid Vapor Pressure (RVP) Standard Relaxation in Gaston and Mecklenburg Counties"* (RVP-related SIP). The RVP-related SIP requested the USEPA to change the Federal requirement Reid vapor pressure (RVP) in Gaston and Mecklenburg Counties from 7.8 psi to 9.0 psi. The RVP-related SIP also included updated motor vehicle emissions budgets that incorporated the RVP changes to Gaston and Mecklenburg Counties. In a final rule on July 28, 2015, the USEPA took action in support of the RVP-related SIP revision noninterference demonstration by determining that the changes to the RVP in Mecklenburg and Gaston Counties will not interfere with attainment or maintenance of any NAAQS or with any other applicable provisions of the Clean Air Act.

On May 4, 2017, the North Carolina legislative act signed by Gov. Cooper changed the state's inspection and maintenance (I/M) requirements for the 22 counties subject to the state's expanded I/M program. As a result, the NCDAQ submitted a SIP revision via a letter dated July 25, 2018 to the USEPA to support the state's request to change the vehicle model year coverage for the 22 counties subject to the expanded I/M program. The NCDAQ's SIP revision also included updates

to the Metrolina maintenance plan and associated MVEBs used for transportation conformity. On May 20, 2019, the USEPA proposed to find that the change in the vehicle model year coverage for the 22 counties subject to the expanded I/M program meets the requirements of the CAA section 110(l) and will not interfere with attainment or maintenance of any NAAQS in North Carolina. The USEPA took final action on September 11, 2019 to approve that North Carolina's SIP revision to the vehicle model year coverage for the 22 counties will not interfere with continued attainment or maintenance of any applicable NAAQS and approve the updated emissions for the 2008 8-hour ozone maintenance plan, including the updated MVEBs for the Charlotte 2008 Ozone Maintenance Area. This rule became effective on October 11, 2019. On August 25, 2021, the USEPA took final action to approve a SIP revision allocating a portion of the available safety margin to revised the 2026 MVEB's used for transportation conformity. All of the USEPA's federal register notices are in Appendix A.

South Coast Air Quality Mgmt. District v. EPA ("South Coast II")

On February 16, 2018, the United States Court of Appeals for the District of Columbia Circuit in *South Coast Air Quality Mgmt. District v. EPA* ("South Coast II," 882 F.3d 1138) held that transportation conformity determinations must be made in areas that were either nonattainment or maintenance for the 1997 ozone NAAQS and attainment for the 2008 ozone NAAQS when the 1997 ozone NAAQS was revoked. These conformity determinations are required in these areas after February 16, 2019. As previously stated, a portion of the Metrolina Area was designated attainment with a maintenance plan for the 2008 ozone NAAQS with an effective date of July 28, 2015. Therefore, per the *South Coast II* decision, this conformity determination is being made for that partial portion of the 1997 8-hour ozone NAAQS.

For the 1997 8-hour ozone NAAQS areas, transportation conformity for metropolitan transportation plans (MTPs) and state transportation improvement program (TIP) for the 1997 8-hour ozone NAAQS can be demonstrated without a regional emissions analysis, per 40 CFR 93.109(c). This provision states that the regional emissions analysis requirement applies one year after the effective date of the USEPA's nonattainment designation for a NAAQS and until the effective date of revocation of such NAAQS for an area. The 1997 8-hour ozone NAAQS revocation was effective on April 6, 2015, and the *South Coast II* court upheld the revocation. As no regional emission analysis is required for this conformity determination, there is no requirement to use the latest emissions model, except to address transportation control measures (TCMs), or budget or interim emissions tests for the 1997 8-hour ozone NAAQS. There are no TCMs in the Metrolina SIP.

Therefore, transportation conformity for the 1997 8-hour ozone NAAQS for the Metrolina Area [Cabarrus-Rowan Metropolitan Planning Organization (CRMPO), Gaston-Cleveland-Lincoln Metropolitan Planning Organization (GCLMPO), and Charlotte Regional Transportation Planning Organization (CRTPO)] and NC Department of Transportation (NCDOT) FY 2020 – 2029 Transportation Improvement Program can be demonstrated by showing the remaining requirements in Table 1 in 40 CFR 93.109 have been met.

These requirements, which are laid out in Section 2.4 of the USEPA's November 2018 Guidance

and are addressed in the remainder of the document and includes:

- Latest planning assumptions (93.110)
- Consultation (93.112)
- Transportation Control Measures (93.113)
- Fiscal constraint (93.108)

The purpose of this report is to document compliance with the provisions of the Clean Air Act Amendments of 1990 (CAAA), the Moving Ahead for Progress in the 21st Century Act (MAP-21) and the Bipartisan Infrastructure Bill (BIL). The conformity determination for the FY 2024-2033 Transportation Improvement Program is based primarily on a regional emissions analysis that utilized the transportation networks in adopted and conforming 2050 Metropolitan Transportation Plans and the resulting emissions modeled by the North Carolina Division of Air Quality. The Conformity Determination Report (CDR) for the 2023-2033 STIP update is available on the following websites:

- Cabarrus-Rowan MPO:
<http://crmpo.org/Plans/Transportation-Conformity>
- Gaston-Cleveland-Lincoln MPO:
<https://gclmpo.org/plans-programs-and-studies/long-range-planning/>
- Charlotte Regional TPO:
<https://www.crtpo.org/metropolitan-transportation-plan-1>

The FY 2024-2033 TIPs for the Metrolina Area contain a number of project changes which should be included in the 2050 MTP and Transportation Conformity Determination for the Metrolina Area. This conformity determination for the Metrolina area includes a new regional emissions analysis that ensures that the FY 2024-2033 TIPs are direct subsets of the 2050 MTPs.

The MPOs and the NCDOT are required by 23 CFR Parts 450 and 500 and 40 CFR Parts 51 and 93 to make a conformity determination on any newly adopted or fiscally-constrained MTPs and TIPs. The intent of this report is to document the transportation conformity determination for the FY 2024-2033 TIPs for the Metrolina Area and projects from the FY 2024-2033 State TIP for the donut area in Union County. In addition, the United States Department of Transportation (USDOT), specifically, the Federal Highway Administration (FHWA) must make a conformity determination on the MTPs and TIPs in all non-attainment and maintenance areas. The Metrolina Area is maintenance for the 2008 8-hour ozone.

Transportation Conformity Determinations for the 2050 MTP and 2024-2033 STIP for the Metrolina Area were approved as follows:

- Cabarrus-Rowan MPO: **March XX, 2023**
- Gaston-Cleveland-Lincoln MPO: **March XX, 2023**
- Charlotte Regional Transportation Planning Organization: **March XX, 2023**

- The North Carolina Department of Transportation (NCDOT) (for the donut portion in Union County in the Metrolina Ozone Maintenance Area): **April XX, 2023**

By these actions, the MPOs and NCDOT demonstrated that the 2050 MTPs are consistent with Section 176(c) of the Clean Air Act, the State Implementation Plan, MAP-21, and 40 CFR Parts 51 and 93. These conformity demonstrations were documented by the MPOs and NCDOT in this report. This report includes the regional emissions analysis comparison prepared for the 2050 MTPs demonstrating that emissions in each of the analysis years of the MTP (2025, 2035, 2045, and 2050) are less than the motor vehicle emissions budgets established by the attainment demonstration and maintenance plan SIP in accordance with 40 CFR Part 93 and approved by the USEPA. (See Appendix A for details on MVEBs in the SIP.)

Metropolitan Transportation Plans

As noted above, the 2050 MTPs include the timing of regionally significant projects included in the FY 2024-2033 TIP for the Metrolina Area. A new regional emissions analysis was conducted for this transportation conformity determination to reflect the appropriate horizon year for these regionally significant projects. As agreed upon by the interagency consultation partners, the regional emissions analysis work for this process began on August 16, 2022 and was completed on January 24, 2023. Details related to the interagency consultation associated with this conformity determination can be found in Appendix C.

Non-exempt projects in the 2050 MTPs are required to be part of travel demand model assumptions for the appropriate analysis year. All projects are included in the travel model assumptions for the appropriate horizon year. The 2050 MTPs provide an opportunity to incorporate the most current cost estimates as required in the fiscal constraint requirements. This conformity analysis will focus on the regionally significant 2050 MTP projects presented in Appendix D as reviewed by the Interagency partners on October 25, 2022. There were no regional significant projects in the Donut area.

FISCAL CONSTRAINT DETERMINATION

As part of the federal transportation planning requirements 23 CFR Parts 450 and 500 for MTPs, the costs of implementing transportation programs and projects included in MTPs are compared with the funding expected to be available. These MTPs' financial analyses were developed in response to the requirements for "financially-constrained plans".

These MTPs consider capital costs and operation and maintenance (O&M) costs associated with the preservation and continued operation of the existing transportation system, as well as the costs associated with the recommended expansion of the transportation networks included in the MTPs. The MTPs also describe revenues from all sources that will be available to pay for capital and O&M costs. Each MTP describes in detail its own financing plan.

2.0 Relationship of the MTP and TIP

In accordance with 40 CFR Parts 51 and 93, the TIP is a direct subset of the MTP if the following conditions are met:

- The TIP is consistent with the conforming MTP such that the regional emissions analysis performed on the MTP applies to the TIP;
- The TIP contains all projects which must be started in the TIP's timeframe to implement the highway and transit system envisioned by the MTP in each of its horizon years;
- All federally funded TIP projects which are regionally significant are part of the specific highway or transit system envisioned in the MTP horizon years; and
- The design concept and scope of each regionally significant project identified in the TIP is not significantly different from that described in the MTP.
- The number of travel lanes of each regionally significant project identified in the TIP is not significantly different from that described in the MTP.

This report documents that the TIPs for FY 2024-2033 are a direct subset of the 2050 MTPs for the Cabarrus-Rowan MPO, the Gaston-Cleveland-Lincoln MPO, the Charlotte Regional Transportation Planning Organization and the projects from the donut area in Union County is the responsibility of the North Carolina Department of Transportation. The 2050 MTPs for these areas are fiscally-constrained and are consistent with 23 CFR Part 450 Subpart C. This conformity determination is based on the most recent estimates of the emissions and the most recent planning assumptions (including population, employment, travel and congestion estimates available) as determined by the appropriate MPOs and NCDOT. It has been demonstrated in the Conformity Determination Report that the 2050 MTPs conform to the provisions of the CAAA of 1990, MAP-2, and BIL. Also, the 2050 MTPs conform to the purpose of the TIP in accordance with 40 CFR Part 93.

3.0 Latest Planning Assumptions

The planning assumptions used to develop the Conformity Determination Report for the 2008 8-hour ozone NAAQS are the latest planning assumptions in the 2050 MTP that were approved by the respective MPOs and NCDOT. Estimates of future population and employment are less than five years old. The vehicle age distribution and fleet mix distributions used as input to the emission model were based on the current data from North Carolina Division of Motor Vehicles. This data is also less than five years old. The planning assumptions are outlined in the pre-consensus plan in Appendix C.

4.0 Transportation Control Measures

As mentioned before, there are no TCMs in the Metrolina SIP.

5.0 Interagency Consultation

The FY 2024-2033 TIP conformity has undergone interagency consultation as required in the North Carolina Administrative Code Title 15A Subpart 02D .0201-.0203 inclusive. An Interagency consultation meeting involving the MPOs, NCDOT, NCDAQ, FHWA and USEPA-Region 4 was held on August 16, 2022. A summary of issues raised and responses, along with any written agency comments, are provided in Appendix I.

6.0 Public Involvement

The FY 2024-2033 TIP and 2050 MTP were reviewed by the public in accordance with the Public Involvement Policies of the Cabarrus-Rowan MPO, the Gaston-Cleveland-Lincoln MPO, the Charlotte Regional Transportation Planning Organization and the NCDOT. This report was also made available for public review by the Rocky River Rural Planning Organization (RRRPO). Copies of citizen comments and agency responses to them are attached to this report in Appendix I. The newspaper advertisements for public review and comment period are attached to this report in Appendix J.

7.0 Regional Emissions Analysis Approach

The regional emissions analysis (REA) was conducted using the 2008 8-hour ozone Maintenance Plan (9.0 psi RVP based) MVEBs published on August 25, 2021. The horizon years for this conformity determination are 2026, 2035, 2045, and 2050. The 2026 MVEB will be used for years 2026, 2035, 2045, and 2050.

Approved 2008 8-hour Ozone Maintenance SIP (kilograms/day) – (9.0 psi RVP)

9.0 Findings of Conformity

Cabarrus-Rowan MPO Ozone Conformity Finding for the 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program

Based on the analysis and consultation and involvement process described in this report, the Cabarrus-Rowan MPO 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program are found to conform to the purpose of the North Carolina SIP. The emissions expected from the implementation of the Cabarrus-Rowan MPO 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program are in conformity with the 2008 8-hour ozone standard.

Gaston-Cleveland-Lincoln MPO Ozone Conformity Finding for the 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program

Based on the analysis and consultation and involvement process described in this report, the Gaston-Cleveland-Lincoln MPO 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program are found to conform to the purpose of the North Carolina SIP. The emissions expected from the implementation of the Gaston-Cleveland-Lincoln MPO 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program are in conformity with the 2008 8-hour ozone standard.

Charlotte Regional Transportation Planning Organization Ozone Conformity Finding for the 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program

Based on the analysis and consultation and involvement process described in this report, the Charlotte Regional Transportation Planning Organization 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program are found to conform to the purpose of the North Carolina SIP. The emissions expected from the implementation of the Charlotte Regional Transportation Planning Organization 2050 Metropolitan Transportation Plan and 2024-2033 Transportation Improvement Program are in conformity with the 2008 8-hour ozone standard.

NCDOT Donut Area Conformity Finding for Projects from the 2024-2033 State Transportation Improvement Program

Based on the analysis and consultation and involvement process described in this report, the projects from the 2024-2033 State Transportation Improvement Program for the donut area in Union County that is outside of the MPO boundary is found to conform to the purpose of the North Carolina State Implementation Plan. The emissions expected from the implementation of the projects from the 2024-2033 State Transportation Improvement Program are in conformity with the 2008 8-hour ozone standard.

The MPO/NCDOT conformity determinations and TIP/MTP adoptions are provided in Appendix J. The USDOT Conformity Determination Letter is provided in Appendix K.

Resolution Finding the Cabarrus-Rowan Urban Area 2050 Metropolitan Transportation Plan and the 2024-2027 Transportation Improvement Program in Compliance with the Provisions of the Clean Air Act Amendments of 1990 and 23 U.S.C. 134

A motion was made by _____ and seconded by _____ for adoption of the following resolution, and upon being put to a vote was duly adopted.

WHEREAS, the Transportation Advisory Committee is the duly recognized decision making body of the 3-C transportation planning process for the Cabarrus-Rowan Urban Area; and

WHEREAS, the Cabarrus-Rowan 2050 Metropolitan Transportation Plan meets the planning requirements of 23 CFR Part 450.322; and

WHEREAS, the FY 2024 2027 Transportation Improvement Program is a direct subset of the 2050 Metropolitan Transportation plan; and

WHEREAS, the United States Environmental Protection Agency (USEPA) designated Cabarrus-Rowan Urban Area as a marginal nonattainment area for the 2008 ozone standard effective on July 20, 2012, and due to improved air quality in the region was re-designated as a maintenance area on August 27, 2015; and

WHEREAS, the transportation conformity analysis of the Cabarrus-Rowan 2050 Metropolitan transportation plan is based on the most recent estimates of population, employment, travel, and congestion; and

WHEREAS, the Cabarrus-Rowan 2050 Metropolitan Transportation Plan and the FY 2024-2027 Transportation Improvement Program are financially constrained; and

WHEREAS, there are no transportation control measures in the North Carolina State Implementation Plan (SIP) that pertain to the Cabarrus-Rowan area; and

WHEREAS, the most recent vehicle emissions model was used to prepare the quantitative emissions analysis; and

WHEREAS, those projects and programs included in the Cabarrus-Rowan 2050 Metropolitan Transportation Plan and the FY 2024-2027 Transportation Improvement Program contribute to annual emissions reductions as shown by the quantitative emissions analysis.

NOW, THEREFORE BE IT RESOLVED, that the Cabarrus-Rowan Transportation Advisory Committee finds that the Cabarrus-Rowan 2050 Metropolitan Transportation Plan and FY 2024-2027 Transportation Improvement Program conform to the purpose of the North Carolina State Implementation Plan in accordance with Clean Air Act as Amended (CAAA), and the 23 U.S.C. 134.

I, Ryan Dayvault, Transportation Advisory Committee Chair, do hereby certify that the above is a true and correct copy from the excerpt from the minutes of a meeting of the Cabarrus-Rowan Transportation Advisory Committee, duly held on the 23rd day of August, 2023.

Signature of the TAC Chair
Cabarrus-Rowan Urban Area

RESOLUTION ADOPTING THE FY 2024-2027 CABARRUS-ROWAN MPO METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP)

A motion was made by _____ and seconded by _____ for adoption of the following resolution, and upon being put to a vote was duly adopted.

WHEREAS, the Transportation Advisory Committee has found that the Metropolitan Planning Organization is conducting transportation planning in a continuous, cooperative, and comprehensive manner in accordance with 23 CFR Part 450.322; and

WHEREAS, The Metropolitan Transportation Improvement Program (MTIP) is a staged multiple year listing of all funded transportation projects scheduled for implementation within the Cabarrus-Rowan Urban Area which have been selected from a priority list of projects; and

WHEREAS, The document provides the mechanism for official endorsement of the program of projects by the Transportation Advisory Committee (TAC); and

WHEREAS, Projects listed in the MTIP are also included in the State TIP (STIP) and balanced against anticipated revenues as identified in the STIP; and

WHEREAS, the Cabarrus-Rowan MPO FY 2024-2027 Metropolitan Transportation Improvement Program (MTIP) is a direct subset of the currently conforming 2050 Metropolitan Transportation Plan as adopted March 23, 2022, which means that no changes in scope, timing, number of travel lanes, or design have occurred; and

WHEREAS, the following attached amendment has been proposed; and

WHEREAS, the Metropolitan Transportation Plan has a planning horizon year of 2050, and meets all the requirements in 23 CFR 450; and

WHEREAS, the Transportation Advisory Committee has found that the Transportation Improvement Program conforms to the purpose of the North Carolina State Implementation Plan for maintaining the National Ambient Air Quality Standards in accordance with 40 CFR 51 & 93; and

WHEREAS, the Transportation Advisory Committee has provided for a public comment period for the Metropolitan Transportation Improvement Program Amendment consistent with the MPO TIP Public Involvement Policy; and

NOW THEREFORE, be it resolved by the Cabarrus-Rowan Urban Area Transportation Advisory Committee that the FY 2024-2027 Metropolitan Transportation Improvement Program dated August 23, 2023, for the Cabarrus Rowan Urban Area Metropolitan Planning Organization be adopted on this the 23rd day of August, 2023.

I, Ryan Dayvault, Transportation Advisory Committee Chair, do hereby certify that the above is a true and correct copy from the excerpt from the minutes of a meeting of the Cabarrus-Rowan Transportation Advisory Committee, duly held on the 23rd day of August, 2023.

Signature of the TAC Chair
Cabarrus-Rowan Urban Area

RESOLUTION

TO APPROVE AMENDMENT #1 OF THE FY 2023-2024 UNIFIED PLANNING WORK PROGRAM OF THE CABARRUS-ROWAN URBAN AREA

August 23, 2023

A motion was made by TAC Member _____ and seconded by TAC Member _____ for the adoption of the following resolution, and upon being put to a vote was duly adopted.

WHEREAS, A comprehensive and continuing transportation planning program must be carried out cooperatively in order to ensure that funds for transportation planning projects are effectively allocated to the Cabarrus-Rowan MPO and its member governments and the North Carolina Department of Transportation; and

WHEREAS, The Cabarrus-Rowan MPO requests an amendment to the 2023-2024 UPWP to obligate \$48,000 of the MPO’s Section 104(f) planning funds for FY 2023-2024 for the NC 152 East Corridor Study; and

WHEREAS, Members of the Transportation Advisory Committee agree that the Unified Planning Work Program changes effectively advance the transportation planning for 2023-2024.

Now, therefore, be it resolved that the Transportation Advisory Committee hereby endorses Amendment #1 of the Cabarrus-Rowan Urban Area Unified Planning Work Program for the FY 2023-2024.

I, Ryan Dayvault, Transportation Advisory Committee Chair, do hereby certify that the above is a true and correct copy of an excerpt from the minutes of a meeting of the Cabarrus-Rowan Urban Area Transportation Advisory Committee, duly held on the 23rd day of August, 2023.

Signature of TAC Chair
Cabarrus-Rowan Metropolitan Planning Organization

Subscribed and sworn to me this 23rd day of August, 2023.

TOWN OF CHINA GROVE

To: Cabarrus-Rowan MPO
From: Franklin Gover, Town Manager
CC: NCDOT Division 9
Date: July 12th, 2023
RE: NC 152 HWY Corridor Study Request

The NC 152 Corridor in China Grove is experiencing exponential growth, residential on the west and light industrial on the east. Commercial will certainly develop along the US29/NC152 area. Exit 68 and the NC 152 must be improved to support the anticipated growth. After coordinating with our NCDOT District office it is clear we need to study the area and develop a plan for the corridor moving forward. The Town will collaborate with the division, and district office to incorporate NCDOT's perspectives so the resulting plan supports realistic projects, helps future project scoring, and justification.

Some specific driving factors include:

There is potential for 3-4 million sq. ft. of light industrial warehousing in addition to the 1.5 sq. ft. Macy's fulfillment center on E NC 152, and the redevelopment of the Hitachi Metals site. We are also seeing residential growth in area.

The WNC 152 corridor is seeing residential growth with 3 new major subdivision approved in the last year.

The NC 152/US 29 area will certainly see increased commercial development to support the residential and industrial growth.

The Town of China Grove is requesting \$60,000 in Planning funds to for the study, recognizing these planning funds are reimbursements and require a 20% match, making our share \$12,000.

A RESOLUTION ENDORSING A NEW PROJECT FOR WESTERN NORTH CAROLINA RAIL SERVICE FOR THE CABARRUS-ROWAN METROPOLITAN PLANNING ORGANIZATION REGIONAL PRIORITY LIST

WHEREAS, the North Carolina Board of Transportation (BOT), every two years, prepares a Statewide Transportation Improvement Program (STIP) that identifies transportation projects to be implemented over the next seven years with State and Federal funding; and

WHEREAS, the North Carolina BOT solicits input for identifying transportation projects of local and regional importance to be included in the next STIP; and

WHEREAS, the Cabarrus-Rowan Transportation Advisory Committee is charged with the development of a Metropolitan Transportation Improvement Program (MTIP); and

WHEREAS, City of Salisbury is a member jurisdiction of the CRMPO; and

WHEREAS, the Cabarrus-Rowan MPO encourages the North Carolina Department of Transportation (NCDOT) to design all projects, where appropriate, to support alternative means of transportation; and

WHEREAS, City of Salisbury has outlined its transportation and highway project priorities within the CRMPO planning area in the attached application to the MPO;

NOW, THEREFORE, BE IT RESOLVED by City of Salisbury that the Board endorses the following new rail project to be evaluated on the list of projects that will ultimately be considered for the FY 2026-2035 CRMPO MTIP.

- 1 *Western North Carolina (WNC) passenger rail service, operating along the Norfolk Southern AS-Line, for approximately 139 miles between Salisbury and Asheville. This project is anticipated to connect WNC communities with the Piedmont and Carolinian services in Salisbury, providing three round trips per day with approximately 100,000 annual local trips in 2045, and up to 290,000 additional WNC trips connecting to the Piedmont and Carolinian.*

This project will be submitted as a new project to be considered for inclusion in the next update of the CRMPO Metropolitan Transportation Plan (MTP) and MTIP as well as the 2026-2035 STIP.

Upon motion of Council Member Harry McLaughlin, the foregoing resolution was adopted this the 18th day of July, 2023.

I, Connie B. Snyder, City Clerk, **DO HEREBY CERTIFY** that the foregoing is a true copy of so much of the proceedings of said Council at a meeting held on July 18, 2023, as relates in any way to the adoption of the foregoing and that said proceedings are recorded in the minutes of said Council.

WITNESS my hand and the seal of said City, this 20th day of July 2023.

Connie B Snyder

Cabarrus-Rowan MPO

Local Highway Priority List Project Request Form

Agency: City of Salisbury

Type of Project: Rail

Location: Western North Carolina Rail Passenger Service between Asheville and Salisbury

Length and Scope: Asheville to Salisbury passenger service, to operate along the Norfolk Southern AS-Line for approximately 139 miles

Right of Way: The Draft Western NC Rail Feasibility Study recommendations include specific construction projects such as installing power turnouts, extensions and/or rehabilitations of sidings, track and bridge upgrades, and upgrades to crossing warning predictors at the highway-railroad at-grade crossings along the corridor, as well as intermediate station stops/needs.

Summary of Need / Benefit of Project: Please see the attached summary of the 2023 Western North Carolina Passenger Rail Feasibility Study (Draft)

Other Information:

- Preliminary Estimate: Capital Costs of \$665 million, and Annual Operating Costs between \$7.3 and \$10.9 million
- Resolution of support included

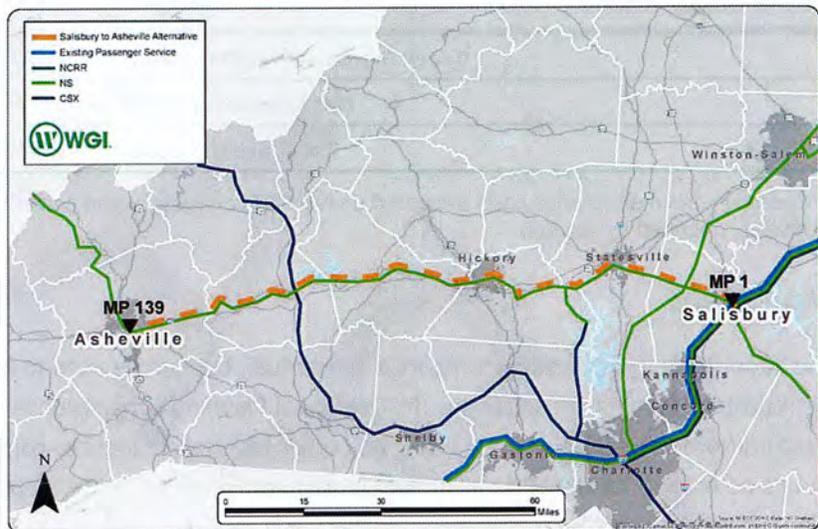

2023 Western North Carolina Passenger Rail Feasibility Study (Draft)

The Western North Carolina (WNC) Passenger Rail Feasibility Study (the study) provides conceptual level capital costs, operating costs, and a range of ridership and revenue associated with a new intercity passenger service connecting Asheville, N.C. with the existing state-supported passenger services in Salisbury, N.C. The Asheville-to-Salisbury service would operate along the Norfolk Southern (NS) AS-Line for approximately 139 miles as shown in Figure 1.

Although passenger rail service has not served western North Carolina for some time, the area itself still attracts millions of visitors each year—many from cities that are currently served by existing state-supported and long-distance intercity passenger rail services. The service described in this study would connect western North Carolina communities with communities between Charlotte, Raleigh, and future connections to the Northeast. Intercity passenger rail service can connect rural, suburban, and urban centers and enhance peoples' access to jobs, healthcare, education, and tourism destinations. Local interest in establishing passenger rail service to western North Carolina has been championed by the Western North Carolina Rail Committee and its predecessor committee for more than 25 years.

Nationwide interest in passenger rail service has increased, in part, due to the passage of the Infrastructure Investment and Jobs Act (Bipartisan Infrastructure Law), and the Amtrak Connects US Corridor Vision. The Bipartisan Infrastructure Law and related advance appropriations provide historic levels of funding for the Federal Railroad Administration's Federal-State Partnership for Intercity Passenger Rail discretionary grant program. This available funding and significant interest in the project represent a good opportunity to expand passenger rail to western North Carolina. The following document explores the service characteristics, costs, and the necessary next steps to develop the WNC passenger service.

Figure 1. Western North Carolina Rail Corridor

Service Characteristics and Assumptions

- Connects Western North Carolina communities with the *Piedmont* and *Carolinian* services in Salisbury
- Three round trips per day on the corridor
- Travel times range from 3 hours and 25 minutes to 3 hours and 48 minutes (depending on intermediate station stopping patterns)
- Approximately 100,000 annual local trips in 2045
- Up to 290,000 additional Western North Carolina trips connecting to the *Piedmont* and *Carolinian*

Summary of Conceptual Capital Costs

Item Description	Cost (2023 Dollars)
Track Infrastructure, Rail Signals and PTC	\$369M ¹
Stations	\$81M ^{1,2}
Equipment (3 Train Sets)	\$160M ¹
Maintenance Facility	\$55M ¹
Total WNC Capital Costs	\$665M

¹The conceptual costs shown include 10% project administration costs, 10% for engineering, 5% for mobilization, bonds, and insurance, and 35% for contingencies.

²Station costs include those for the Biltmore Village site alternative, Salisbury, and seven intermediate locations. Additional costs associated with the River Arts District are described in the report.

Summary of Conceptual Operating Costs

Item Description	Cost (2023 Dollars)
Track Signal and Maintenance	\$2.3M ¹
Net Operating Costs	\$5M - \$8.6M
Total Annual Costs	\$7.3M – 10.9M

¹Operating and maintenance costs are based on NCDOT’s experience and analysis of the *Piedmont* and *Carolinian* services, operated by Amtrak.

Next Steps

The information in this feasibility report is conceptual, but can be used to initiate conversations between NCDOT, Metropolitan Planning Organizations (MPOs), Rural Planning Organizations (RPOs), Norfolk Southern, Amtrak, the Western North Carolina Rail Committee, and other key stakeholders to consider including passenger rail services and its associated station and rail infrastructure improvements. Initial steps that can be taken by local communities include the following:

- MPOs, RPOs, and communities can include the intercity passenger service and potential station locations in their respective comprehensive transportation plans.
- MPOs and RPOs can use the information in this report to submit the project to NCDOT’s Strategic Transportation Investments (STI) prioritization process for funding consideration. The next STI submission window opens in July 2023.

NCDOT has submitted this corridor for consideration by the Federal Railroad Administration (FRA) for its Corridor Identification and Development Program (CID). If selected, the program will provide funding to develop a service development plan and prepare environmental documentation for the project. The service development plan will include freight railroad coordination and more detailed discussions on passenger rail operations. The Federal Railroad Administration (FRA) is anticipated to notify NCDOT on the Corridor Identification and Development Program (CID) in the fall of 2023. NCDOT will notify communities, railroads and other stakeholders once FRA’s selections are known.

Cabarrus-Rowan MPO

Local Priority List Project Request Form

Agency: Rowan County

Type of Project: Taxiway

Location: Mid-Carolina Regional Airport

Length and Scope: 5,000 Feet

Right of Way: No

Summary of Need / Benefit of Project: The current Hangar Expansion Project has essentially utilized the remaining developable land on the East side of the airfield and this parallel taxiway will provide the infrastructure essential to begin increasing operational capability of the Airport to the West side of the airfield. This correlates with the approved airport layout plan (ALP).

Other Information: Cost estimate \$17,000,000

This project will be located on the west side of Runway 2-20 at the Mid-Carolina Regional Airport (3670 Airport Loop Road, Salisbury, NC 28147). The project scope will include the required environmental assessment, design, bidding and construction phases to complete the project. This project will impact approximately 10 acres of the airfield. The goal of this project is to prepare for future development on the West side of the airfield. This project is included in the Rowan County Capital Improvement Plan. The project has been discussed with and has support from the Airport Advisory Board, Rowan County Board of Commissioners, **Representative Warren** and Senator Ford.

Our request is for the TCC/TAC to please consider adding on to the P7.0 call for projects that ended May 5th.

RE: Rowan Transit System
Federal Section 5310
Operating

Please accept this letter of support for Rowan Transit System as they seek Federal Section 5310 (Enhanced Mobility of Seniors and Individuals with Disabilities Program) funding to assist in maintaining their current level of service and meet the increasing demand for paratransit in Rowan County. Current data indicates 78% of Rowan Transit System riders reside in rural areas. This Section 5310 funding is critical for providing life sustaining transportation to our elderly and disabled citizens.

Rowan Transit is a non-emergency public transportation service for Rowan County residents, including paratransit service.

Sincerely,

Ryan Dayvault, Chair
Cabarrus-Rowan TAC

Executive Summary

On February 27, 2023, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) conducted the certification review of the transportation planning process for the Cabarrus Rowan Metropolitan Planning Organization (CRMPO). FHWA and FTA are required to jointly review and evaluate the transportation planning process for each Transportation Management Area (TMA), an urbanized area over 200,000 in population, at least once every four years to determine if the process meets the Federal planning requirements.

Previous Findings and Disposition

The last certification review for the CRMPO urbanized area was conducted in 2019. The 2019 certification review findings and disposition are summarized below.

Review Area	Finding	Action	Corrective Actions/ Recommendations/ Commendations	Resolution Due Date
Metropolitan Transportation Plan (MTP) Development Regulation: 23 CFR 450.324	Commendation for using subject matter experts and a CAC to assist with the MTP update.	Commendation	The MPO is commended for using subject matter experts and a CAC to assist with its MTP update.	N/A
Public Outreach Regulations: 23 CFR 450.316; 23 CFR 450.324; 23 CFR 450.326	Commendation for using new and innovative public outreach techniques which have resulted in increased public output.	Commendation	The MPO is commended for its use of new and innovative public outreach techniques which have resulted in increased public input.	N/A
Freight Planning Regulations: 23 CFR 450.306, 23 CFR 450.316	Commendation for involving an extensive number of freight providers in freight planning, and for establishing a committee to inform the freight portion of the MTP update.	Commendation	The MPO is commended for involving an extensive number of freight providers in freight planning, and for establishing a committee to inform the freight portion of the MTP update.	N/A
Title VI and Environmental Justice (EJ)/Limited English Proficiency (LEP) Regulations: 23 CFR 450.220; 23 CFR 450.336	Need to analyze past projects to ensure that cumulative impacts of benefits and burdens are considered.	Recommendation	It is recommended that the MPO analyze past projects to ensure that cumulative impacts of benefits and burdens are considered.	June 2021

Current Findings

The current review found that the metropolitan transportation planning process conducted in the CRMPO urbanized area meets Federal planning requirements. There are also recommendations in this report that warrant attention and consideration for follow-up, as well as areas the MPO is conducting very well that are to be commended.

Review Area	Finding	Action	Corrective Actions/ Recommendations/ Commendations	Resolution Due Date
Title VI and Environmental Justice (EJ)/Limited English Proficiency (LEP) Regulations: 23 CFR 450.220; 23 CFR 450.336	Commendation for expanding and enhancing its mapping efforts by separately mapping African American and Hispanic populations, and by including zero-car households and bicycle and pedestrian crash data	Commendation	The MPO is commended for expanding and enhancing its mapping efforts by separately mapping African American and Hispanic populations, and by including zero-car households and bicycle and pedestrian crash data.	N/A
Public Outreach 23 CFR 450.316; 23 CFR 450.318; 23 CFR 450.324; 23 CFR 450.326	Need to update PPP to ensure effective public outreach	Recommendation	It is recommended that the MPO evaluate its PPP to ensure effective public outreach.	2/25
Title VI and Environmental Justice (EJ)/Limited English Proficiency (LEP) Regulations: 23 CFR 450.220; 23 CFR 450.336	Need to perform quantitative analyses to identify transportation system benefits and burdens, comparing EJ populations to non-EJ populations	Recommendation	It is recommended that the MPO perform quantitative analyses to identify transportation system benefits and burdens, comparing EJ populations to non-EJ populations.	2/25
Title VI and Environmental Justice (EJ)/Limited English Proficiency (LEP) Regulations: 23 CFR 450.220; 23 CFR 450.336	Need to work with NCDOT to document Title VI Plan and make Title VI information available on its website	Recommendation	It is recommended that the MPO work with NCDOT to document its Title VI Plan and make it available on its website.	2/25

Background

Certification reviews consist of three primary activities: 1) a site visit, 2) a review of planning products (in advance of and during the site visit), and 3) preparation of a certification review report that summarizes the review and offers findings. The reviews focus on compliance with Federal regulations, challenges, successes, and experiences of the cooperative relationship between the MPO(s), the State Department of Transportation (DOT), and public transportation operator(s) in the conduct of the

metropolitan transportation planning process. Certification Review guidelines provide agency field reviewers with latitude and flexibility to tailor the review to reflect regional issues and needs. Consequently, the scope and depth of the Certification Review reports will vary significantly.

The Certification Review process is only one of several methods used to assess the quality of a regional metropolitan transportation planning process, compliance with applicable statutes and regulations, and the level and type of technical assistance needed to enhance the effectiveness of the planning process. Other activities provide opportunities for this type of review and comment, including Unified Planning Work Program (UPWP) approval, the Metropolitan Transportation Plan (MTP), metropolitan and statewide Transportation Improvement Program (TIP) findings, air-quality (AQ) conformity determinations (in nonattainment and maintenance areas), and a range of other formal and less formal contact. The results of these other processes are considered in the Certification Review.

While the Certification Review report itself may not fully document those many intermediate and ongoing checkpoints, the “findings” of the Certification Review are based upon the cumulative findings of the entire review effort.

The review process is individually tailored to focus on topics of significance in each metropolitan planning area. Federal reviewers prepare Certification Reports to document the results of the review process. The reports and final actions are the joint responsibility of the appropriate FHWA and FTA field offices, and their content will vary to reflect the planning process review, regardless of whether they relate explicitly to formal “findings” of the review.

To encourage public understanding and input, FHWA and FTA will continue to improve the clarity of the Certification Review reports.

The purpose of the Review is to assess the extent of compliance with the Federal planning requirements, to recognize noteworthy practices, to identify problem areas, and to provide guidance and assistance. This review, and those of all other TMAs in the State, are being conducted only two years after the previous ones to allow more time between each review and subsequent report. The Review consisted of a series of discussions on a variety of transportation planning topics with state and local transportation officials directly involved in the MPO’s highway and transit planning activities. The Review also provided the public an opportunity to offer comments on the MPO’s transportation planning process.

Methodology

The review consisted of a desk audit, a public comment period, including a Public Notice (see Appendix A), and the on-site/hybrid review that was conducted on February 27, 2023. The agenda is included (see Appendix B). In addition to the formal review, routine oversight, such as attendance at meetings, day-to-day interactions, review of work products, and working with the MPO provide a major source of information upon which to base certification findings.

The topics addressed in this report document the regulatory basis, status, and findings. These terms are defined below.

Regulatory Basis – Defines where information regarding each planning topic can be found in the Code

of Federal Regulations (CFR) and/or the United States Code (USC) – the “Planning Regulations” and background information on the planning topic.

Status – Defines what the Transportation Management Area (TMA) is currently doing regarding each planning topic.

Findings – Statements of fact that define the conditions found during the review which provide the primary basis for determining corrective actions, recommendations, and/or commendations for each planning topic.

Commendation – elements that demonstrate innovative, highly effective, well-thought-out procedures for implementing the planning requirements. Elements addressing items that have frequently posed problems nationwide could be cited as commendations.

Recommendation – Items that, while somewhat less substantial and not regulatory, are still significant enough that FHWA and FTA are hopeful that appropriate TMA planning partners will consider taking some action. Recommendations involve the state of the practice or technical improvements, as opposed to solely being based on regulatory requirements.

Corrective Action – Items that fail to meet the requirements of the transportation statute and regulations, thus seriously impacting the outcome of the overall process. The expected change and timeline for accomplishing it are clearly defined.

Statement of Finding

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) find that the CRMPO metropolitan transportation planning process substantially meets Federal requirements and jointly certify the planning process. The review identified commendations, recommendations, and no corrective actions. Details of the certification findings for each of the above items are contained in this report.

Certification

The Cabarrus Rowan Metropolitan Planning Organization’s planning process is certified for four years from the date of this report.

Team Members

The Federal Review Team consisted of the following individuals:

- Mr. George Hoops, PP&D Manager, FHWA, NC Division
- Mr. Bill Marley, Community Planner, FHWA, NC Division
- Ms. Loretta Barren, Community Planner, FHWA, NC Division
- Mr. Brandon Oliver, Community Planner, FHWA, NC Division
- Mr. Joe Geigle, ITS Engineer, FHWA, NC Division
- Ms. Parris Orr, Community Planner, FTA, Region 4

**RESOLUTION ADOPTING THE METROPOLITAN AREA BOUNDARY FOR THE
CABARRUS-ROWAN METROPOLITAN PLANNING ORGANIZATION PURSUANT TO
THE 2020 CENSUS URBANIZED AREA DESIGNATIONS**

WHEREAS, in 1962 Congress enacted federal law (Section 134(a) of Title 23 United States Code) that initiated a requirement that a continuing, cooperative and comprehensive (3-C) transportation planning process be established for all urban areas over 50,000 in population in order to qualify for federal transportation funds; and

WHEREAS, 23 USC 134 and Section 8 of the Federal Transit Act requires that a Metropolitan Planning Organization (MPO) be designated for each urbanized area and that the boundaries of the MPO be expanded after each decennial census to cover the census defined urbanized area as well areas likely to become urbanized in the future; and

WHEREAS, the Cabarrus-Rowan MPO has conducted a review of its urbanized area boundary and proposes the same metropolitan area boundary (MAB) which incorporates all of the urbanized area, with the exception mentioned within, as well as other areas in anticipation of future growth and for transportation planning purposes; and

WHEREAS, portions of the Concord urbanized area located in Mecklenburg County will not be included in the Cabarrus-Rowan MPO planning area and the transportation planning responsibilities for those areas will be transferred to the Charlotte MPO under agreement to be reached with the Charlotte MPO; and

WHEREAS, other affected and adjacent jurisdictions have reviewed and discussed the Census defined urbanized area boundary and have agreed upon their new metropolitan area boundary; and

WHEREAS, the boundary approved by the MPO shall be the boundary of the Cabarrus-Rowan Metropolitan Planning Organization; and

WHEREAS, the MAB Boundary is administered by the North Carolina Department of Transportation (NCDOT) with the approval of the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) of the United States Department of Transportation.

NOW THEREFORE BE IT RESOLVED that the Cabarrus-Rowan Metropolitan Planning Organization hereby adopts the Cabarrus-Rowan Metropolitan Area Boundary and that such boundary will be the boundary for the Cabarrus-Rowan Metropolitan Planning Organization on this the 23rd day of August, 2023.

I, Ryan Dayvault, Chairman of the Cabarrus-Rowan Metropolitan Planning Organization, do hereby certify that the above is a true and correct copy of an excerpt from the minutes of a meeting of the Cabarrus-Rowan Metropolitan Planning Organization, duly held on this the 23rd day of August, 2023.

Ryan Dayvault, Chairman

Phil Conrad, MPO Coordinator

What is CMAQ & CRP?

- Federal grant programs to fund transportation projects that reduce harmful emissions
- CMAQ = Congestion Mitigation and Air Quality
 - Began in 1992
 - Intermodal Surface Transportation Efficiency Act (ISTEA)
 - Reduce CO, PM_{2.5}, PM₁₀, VOC, NO_x
- CRP = Carbon Reduction Program
 - Began in 2022
 - Infrastructure Investment and Jobs Act (IIJA)
 - Reduce CO₂

CMAQ & CRP Stats

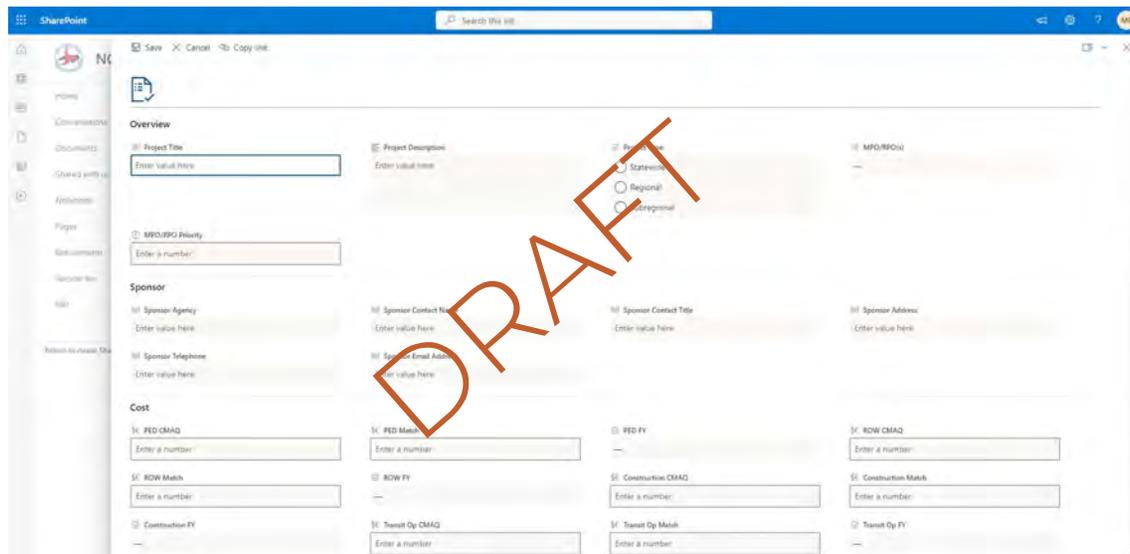

- Call for CMAQ & CRP Projects Ended Mid-March
- CMAQ
 - **25 Applications** from MPOs and RPOs
 - ~\$29M in CMAQ funds requested
 - **10 Applications** from Statewide partners
 - ~\$44M in CMAQ funds requested
 - Total of **~\$73M** in CMAQ funds requested
- CRP
 - **49 Applications** from RPOs, Divisions, and other internal NCDOT business units
 - **~\$61M** in requested CRP funds requested
 - Working with NCDOT Planning and Programming on MPO projects (CRP-DA)

CMAQ & CRP Process Updates [1/2]

- Accepting applications continuously
 - Starts now
 - Applies to both CMAQ and CRP
- NCDOT will review applications in batches on a quarterly basis
 - March 31st
 - June 30th
 - September 30th
 - December 31st
- Goal is to over program CRP and CMAQ due to low obligation rates
- *NCDOT may throttle applications in the future* based on funding availability
- Working with interagency partners to streamline application approvals
- Updated process document coming soon

CMAQ & CRP Process Updates [2/2]

- Moving applications online
 - Use PDF application until live
- Utilize SharePoint for applications storage and database management

- Need volunteers to test out system!

CMAQ & CRP Next Steps

- CMAQ Award Letters → May/June 2023
- CRP Award Letters → June 2023
- Updated CMAQ Guidance Document → June 2023
- CRP Strategy Report Meeting → June 2023

NCDOT TPD NEWS

The Statewide Clean Transportation Plan (NCCTP)

The NCCTP is a guidance document that provides a coordinated strategy for accelerating decarbonization in the transportation sector. Co-created with a variety of stakeholders, the plan outlines how North Carolina can prepare for a clean transportation future and provide equitable outcomes for everyone. Visit NCDOT: [N.C. Clean Transportation Plan](https://www.ncdot.gov/initiatives-policies/environmental/climate-change/Pages/clean-transportation-plan.aspx) (https://www.ncdot.gov/initiatives-policies/environmental/climate-change/Pages/clean-transportation-plan.aspx)

“Connecting people, products and places safely and efficiently with customer focus, accountability and environmental sensitivity to enhance the economy and vitality of North Carolina...”

- NCDOT Mission Statement

Integrated Mobility Division (IMD) Quarterly Update

NCDOT’s Integrated Mobility Division (IMD) held a quarterly [Multimodal Updates Webinar](https://connect.ncdot.gov/business/Transit/Pages/Multimodal-Updates-webinars.aspx) (https://connect.ncdot.gov/business/Transit/Pages/Multimodal-Updates-webinars.aspx) on Thursday, May 25th. The next quarterly meeting will be on Thursday, August 24th at 10:00 am (Please join my meeting from your computer, tablet or smartphone. <https://meet.goto.com/797607149>). These meetings are designed to inform some of IMD partners on planning, policy and programming initiatives that IMD is currently leading.

The August meeting will include an update on the Pedestrian and Bicycle Infrastructure Network (PBIN), Ecusta Trail project and recent grant awards, microtransit deployments at rural transit agencies, newly awarded Multimodal grants, Microtransit Feasibility Studies, and Zero Emission Vehicle (ZEV) transition plans, Complete Streets updates, and more.

Great Trails State Day is October 21, 2023

The 3rd Saturday of October has been officially designated as the “Great Trails State Day”, a day to celebrate trails across the state. For more information about ongoing events across the state that celebrate our diverse trails visit <https://greattrailsonc.com> for more information about events across the state.

North Carolina is home to 41 state parks and several national parks as well. In addition, there are plenty of parks that are less visited, and the diversity of experiences available in parks in NC spans the spectrum. From rugged singletrack to greenways to paddle and equine trails along with sandy paths, there's a park (with a trail) for everyone and every ability.

Hurricane Season

With hurricane season underway, NCDOT crews are prepping for future storms. Staff across the state is ensuring equipment like trucks and chainsaws are running properly and taking inventory of important signage as well. During a hurricane, NCDOT updates DriveNC.gov to include the latest weather-related impacts to transportation. **So before traveling, make sure to visit [DriveNC.gov](https://www.drive-nc.com) for real-time travel information.**

FHWA News

A new FHWA Inflation Reduction Act (IRA) Implementation website serves as a one-stop online shop for transportation agencies and other interested in learning more about IRA programs administered by FHWA. The website includes an overview presentation, funding matrix, and fact sheets and FHWA will populate the site with new information as available. [Inflation Reduction Act - FHWA | Federal Highway Administration \(dot.gov\)](https://www.fhwa.dot.gov/inflation-reduction-act/) (https://www.fhwa.dot.gov/inflation-reduction-act/)

NCDOT 2026-2035 State Transportation Improvement Program (STIP)

The NCDOT is beginning to evaluate projects for its next 10-year capital plan and wants the public to be involved. A 30-day public comment period will run from Aug. 1-31. Within this time frame, the public can send in their comments and suggestions in a short, interactive survey, or may visit local NCDOT offices during designated, weeklong drop-in periods. More information on ways to provide feedback can be found on the [2026-2035 STIP webpage \(https://www.ncdot.gov/initiatives-policies/Transportation/stip/development/Pages/default.aspx\)](https://www.ncdot.gov/initiatives-policies/Transportation/stip/development/Pages/default.aspx).
